Disentangled R. France, 2023-09-14 The Definitive Study and Solution to the Centuries old Mystery of the World's Most Sighted Sea Serpent There is a long history of conflating sightings of unidentified marine objects UMOs as purported sea serpents Most sightings are either of an extremely brief duration or made by a single observer and thus often easy to dismiss This is not the case however with respect to the so called Gloucester Sea Serpent which frequented the Massachusetts and New York coasts during the early nineteenth century Witnessed by hundreds of people for extended periods repeatedly over many days the Gloucester UMO is the most sighted sea serpent in history As well due to being the object of study at the time and shortly thereafter by naturalists the mysterious creature remains the most thoroughly investigated of all putative sea serpents For these reasons it has achieved an exalted status among cryptozoologists who maintain it represents the best evidence for the existence of sea serpents For the first time an eminently qualified aquatic biologist and ethnozoologist presents the definitive history of the phenomena and carefully examines the evidence It is concluded that the most parsimonious explanation behind the Gloucester Sea Serpent is as early evidence for what is today recognized as being one of the most serious threats to marine biodiversity entanglement in fishing gear and other maritime debris Therefore although widely considered to be restricted to the advent and widespread use of non degradable plastic in the middle of the twentieth century this new interpretation of the Gloucester UMO suggests that entanglement has a much longer environmental history than is commonly believed Robert L France is a world renowned scientist at Dalhousie University and the author or editor of twenty books and two hundred papers on a wide range of environmental subjects He has undertaken conservation biology research from the High Arctic to the tropics on organisms from bacteria to whales which has been cited many thousands of times in the literature Dr France is a leading authority on

many aspects of aquatic zoology including marine ecology and ethnozoology and may be the most qualified person to have recently undertaken research and published peer reviewed articles on the beguiling and befuddling topic of aquatic mystery animals known as cryptids      **The Publishers Weekly** ,1920      **Therese Makes a Tapestry** Alexandra S.
