The range and power of SGML tools have taken a sharp upward turn the first step leading to this was that the Web came along with HTML and showed the whole world that pointy brackets and at least somewhat descriptive markup could make a difference. Soon afterward HTML claustrophobia began to grow and XML came to the rescue. Since XML is fundamentally an elegant subset of SGML that reduces complexity without reducing functionality the movement to XML is great for SGML too. The massive interest in XML is bringing forth a huge variety of new faster more powerful and cheaper software tools. Peter has caught the cusp of this change and shows in detail how SGML and XML tools fit together into integrated solutions that return value for your investment in structured information. **Defense Standardization Program Journal , 2007** Index of Specifications and Standards , 2005 Frontiers in Enterprise Integration Li D. Xu, 2020-10-28 Enterprise Information Systems (EIS) integrate and support business processes across functional boundaries in a supply chain environment and have become increasingly popular over the last 15 years. In recent years more and more enterprises world wide have adopted EIS such as Enterprise Resource Planning (ERP) for running their businesses. Previously information systems such as CAD/CAM, MRPII and CRM were widely used for partial functional integration within a business organization. With global operation, global supply chain and fierce competition in place there is a need for suitable EIS such as ERP, E-Business or E-Commerce systems to integrate extended enterprises in a supply chain environment with the objective of achieving efficiency, competency and competitiveness. As a result there is a growing demand for researching EIS to provide insights into challenges, issues and solutions related to the design, implementation and management of EIS. The papers in *Advances in Enterprise Information Systems* were selected from two premier international conferences: the International Forum of Information Systems Frontiers Xian International Symposium (IFISF) June 29-30 2006 Xian China and the IFIP TC 8/9 International Conference on Research and Practical Issues of Enterprise Information Systems (Confenis) 2007 October 14-16 Beijing China. Both events provided an excellent opportunity for EIS academicians and practitioners in the world to gather and exchange ideas and present original research in their fields. *Advances in Enterprise Information Systems* will be invaluable to scientists, researchers and
