

Chapter One

Introduction to International Accounting

Learning Objectives

After reading this chapter, you should be able to:

- Discuss the nature and scope of international accounting.
- Describe accounting issues confronted by companies involved in international trade (import and export transactions).
- Explain reasons for, and accounting issues associated with, foreign direct investment.
- Describe the practice of cross-listing on foreign stock exchanges.
- Explain the notion of global accounting standards.
- Examine the importance of international trade, foreign direct investment, and multinational corporations in the global economy.

WHAT IS INTERNATIONAL ACCOUNTING?

Most accounting students are familiar with financial accounting and managerial accounting, but many have only a vague idea of what international accounting is. Defined broadly, the accounting in international accounting encompasses the functional areas of financial accounting, managerial accounting, auditing, taxation, and accounting information systems.

The word *international* in international accounting can be defined at three different levels.¹ The first level is supranational accounting, which denotes standards, guidelines, and rules of accounting, auditing, and taxation issued by supranational organizations. Such organizations include the United Nations, the Organization for Economic Cooperation and Development, and the International Federation of Accountants.

¹ This framework for defining international accounting was developed by Professor Konrad Kubin in the preface to *International Accounting Bibliography: 1982–1994*, distributed by the International Accounting Section of the American Accounting Association (Sarasota, FL: AAA, 1997).
