Structuring People Eva Marie Schindler,2021-12-09 Participation has become an orthodoxy in the field of development an essential element of projects and programmes This book analyses participation in development interventions as an institutionalised expectation a rationalized myth and examines how organisations on different levels of government process it At least two different objectives of participation are appropriate and legitimate for international organisations in the field the empowerment of local beneficiaries and the achievement of programme goals Both integrate participatory forums into the organisational logic of development interventions Local administrations react to the institutionalised expectation with means ends decoupling where participatory forums are implemented superficially but de facto remain marginalised in local administrative processes and activities The book furthermore provides a thick description of the organisationality of participation in development

interventions Participatory forums are shown to be a form of partial organisation They establish an order in the relationship between administrations and citizens through the introduction of rules and the creation of a defined membership At the same time this order is found to be fragile and subject to criticism and negotiation

Research Universities in Africa Cloete, Nico, Bunting, Ian, 2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa

Democracy and the Discourse on Relevance Within the Academic Profession at Makerere University Kronstad Felde, Tor Halvorsen, 2021-09-20 Democracy and the Discourse on Relevance Within the Academic Profession at Makerere University is set against the backdrop of the spread of neoliberal ideas and reforms since the 1980s While accepting that these ideas are rooted in a longer history the authors reveal how neoliberalism has transformed the university

sector and the academic profession In particular they focus on how understandings of what knowledge is relevant and how this is decided have changed Taken as a whole reforms have sought to reorient universities and academics towards economic development in various ways Shifts in how institutions and academics achieve recognition and status combined with the flow of public funds away from the universities and the increasing privatisation of educational services are steadily downgrading the value of public higher education As research universities adopt user and market oriented operating models and prioritise the demands of the corporate sector in their research agendas the sale of intellectual property is increasingly becoming a primary criterion for determining the relevance of academic knowledge All these changes have largely succeeded in transforming the discourse around the role of the academic profession in society In this context Makerere University in Uganda has been lauded as having successfully achieved transformation However far from highlighting the allegedly positive outcomes of this reform this book provides worrying insights into the dissolution of Ugandas academic culture Drawing on interviews with over ninety academics at Makerere University from deans to doctoral students the authors provide first hand accounts of the pressures and problems the reforms have created Disempowered overworked and under resourced many academics are forced to take on consultancy work to make ends meet The evidence presented here stands in stark contrast to the successes claimed by the university However as the authors also show local resistance to the neoliberal model is rising as academics begin to collaborate to regain control over what knowledge is considered relevant and wrestle with deepening democracy The authors careful expos of how neoliberalism devalues academic knowledge and the urgency of countering this trend makes *Democracy and the Discourse on Relevance Within the Academic Profession at Makerere University* highly relevant for anyone working in higher education or involved in shaping policy for this sector

Postgraduate Research Engagement in Low Resource Settings Atibuni, Dennis Zami, 2019-09-27 The general academic progression and particularly research engagement of postgraduate students is characterized by various problems such as high dropout rates longer completion times low graduation rates and high repetition or retake rates This means that there are far fewer students pursuing postgraduate studies at tertiary institutions and universities than there are at the lower levels of education Yet there is growing demand for postgraduate education given its strong projected association with socioeconomic transformation at national and international levels among developed and developing countries alike *Postgraduate Research Engagement in Low Resource Settings* sets out to garner strategies for fostering efficiency of research conduct among the students and faculty so as to enhance high quality output for the envisaged personal societal national and international socioeconomic transformation Covering a range of topics such as intellectual property mental health and quality assurance this book is ideal for research supervisors higher education faculty librarians educators administrators researchers academicians and students

Timmons Roberts,Saleemul Huq,Victoria Hoffmeister,2018-04-09 The Paris Framework for Climate Change Capacity Building pioneers a new era of climate change governance performing the foundational job of clarifying what is meant by the often ad hoc one off uncoordinated ineffective and unsustainable practices of the past decade described as capacity building to address climate change As an alternative this book presents a framework on how to build effective and sustainable capacity systems to meaningfully tackle this long term problem Such a reframing of capacity building itself requires means of implementation The authors combine their decades long experiences in climate negotiations developing climate solutions climate activism and peer reviewed research to chart a realistic roadmap for the implementation of this alternative framework for capacity building As a result this book convincingly makes the case that universities as the highest and sustainable seats of learning and research in the developing countries should be the central hub of capacity building there This will be a valuable resource for students researchers and policy makers in the areas of climate change and environmental studies National Child-focused Policy Research Agenda 2016-2020 ,2016 **Uganda** International Monetary Fund.
