Quality Assessment and Enhancement in Higher Education in Africa Peter Neema-Abooki, 2022-12-16 This book explores quality assessment and enhancement in higher education in Africa to illustrate the need to develop quality practices in measuring effective education and continually search for permanent improvement. The book demonstrates that technological and socio-economic trends, innovations and inventions of the twenty-first century demand that additional attention be placed upon education for national, regional and international development. Since conventions for quality assessment and enhancement need to be defined and systematic structures constructed to develop quality practices, the book shows how quality in higher education within Africa has been established and advanced to provide a framework for monitoring, auditing and reviewing assessment and enhancement. Though the book considers African complexities and diversity, it incorporates global trends and utilises an international focus that enables readers to devise appropriate strategies for developing and enhancing quality and standards in higher education in both continental Africa and beyond. Illustrating why quality assessment and enhancement should be embraced in all aspects including inputs, processes, outputs and outcomes in educational settings globally, this book will be of interest to policymakers and scholars in the fields of Higher Education, Quality and Global Studies, African Education, African Studies and Management and Administration, Leadership and Professional Development Studies.

Doctoral Examination: Exploring Practice Across the Globe Vijay Kumar, Stan Taylor, Sharon Sharmini, 2022-11-30 This book considers how the main doctoral awarding countries from across the globe examine doctoral degrees. It compares and contrasts their approaches, comments on their robustness and identifies examples of good practice. The doctorate is the highest award made by universities, but the examination process involved varies considerably in form and structure across the globe. This book studies the similarities and differences systematically on a cross-national basis, providing insights into the ways in which countries have sought to ensure that the awarded degree is comparable in standards. This book presents case studies of examination policies and practices covering 20 countries which collectively are responsible for nearly 75% of global doctoral awards. Each chapter includes a summary of the key points and a concluding chapter analyses the case studies from a comparative perspective. This book is written by a distinguished international team of authors who are researchers in doctoral education and will be of interest to all those engaged in the field, particularly policy makers, graduate deans and programme leaders, supervisors, administrators, examiners and scholars in the field.

Artificial Intelligence (AI) and Finance Bahaaeddin A. M. Alareeni, Islam Elgedawy, 2023-08-26 Artificial intelligence AI has the potential to significantly improve efficiency reduce costs and increase the speed and accuracy of financial decision making making it an increasingly important tool for financial professionals One way that AI can improve efficiency in finance is by automating tasks and processes that are time consuming and repetitive for humans For example AI algorithms can be used to analyze and process large amounts of data such as financial statements and market data in a fraction of the time that it would take a human to do so This can allow financial professionals to focus on higher value tasks such as interpreting data and making strategic decisions rather than being bogged down by mundane tasks AI can also reduce costs in finance by increasing automation and eliminating the need for certain tasks to be performed manually This can result in cost savings for financial institutions which can then be passed on to customers in the form of lower fees or better services AI can be used to identify unusual patterns of activity that may indicate fraudulent behavior This can help financial institutions reduce losses from fraud and improve customer security AI powered chatbots and virtual assistants can help financial institutions provide faster more efficient customer service particularly when it comes to answering common questions and handling routine tasks Some financial institutions are using AI to analyze market data and make trades in real time AI powered trading algorithms can potentially make faster and more accurate trading decisions than humans In terms of speed and accuracy AI algorithms can analyze data and make decisions much faster than humans and can do so with a high degree of accuracy This can be particularly useful in fast moving financial markets where quick and accurate decision making can be the difference between success and failure This book highlights how AI in finance can improve efficiency reduce costs and increase the speed and accuracy of financial decision making Moreover the book also focuses on how to ensure the responsible and ethical use of AI in finance This book is a valuable resource for students
