## **Making Middle Sea Cyprian Broodbank:**

**The Making of the Middle Sea** Cyprian Broodbank, 2013-12-02 A masterpiece of archaeological and historical writing The Making of the Middle Sea is extensively illustrated and ranges across disciplines subject matter and chronology from early humans to the rise of civilizations Egyptian Minoan Mycenaean Phoenician Etruscan early Greek and pan Mediterranean It is the only up to date full interpretive synthesis on the rise of the Mediterranean world from its beginnings to the threshold of Classical times The author is Professor of Mediterranean Archaeology at the Institute of Archaeology University College London offers us a Mediterranean like nothing we have seen before in vivid and commanding prose that sweeps majestically across time and space while providing a stunning granularity of detail Daniel Lord Smail Harvard University

The Making of the Middle Sea Cyprian Broodbank, 2024-10-17 The Mediterranean has been for millennia one of the global cockpits of human endeavour World class interpretations exist of its Classical and subsequent history but there has been remarkably little holistic exploration of how its societies culture and economies first came into being despite the fact that almost all the fundamental developments originated well before 500 BC Mediterranean archaeology is one of the worlds richest sources for the reconstruction of ancient societies yet this book is the first to draw in equal measure on ideas and information from the European western Asian and African flanks as well as the islands at the Mediterraneans heart to achieve a truly innovative focus on the varied trajectories and interactions that created this maritime world The Making of the Middle Sea is extensively illustrated and ranges across disciplines subject matter and chronology from early humans and the origins of farming and metallurgy to the rise of civilizations Egyptian Levantine Minoan Mycenaean Phoenician Etruscan early Greek and ultimately pan Mediterranean

**Phoenicians and the Making of the Mediterranean** Carolina López-Ruiz, 2022-01-04 Long before Greeks dominated the ancient Mediterranean Phoenicians were the lords of the sea Setting out from their Levantine cities they introduced their alphabet art technology and gods to places as far as off as Iberia Carolina L pez Ruiz highlights the enduring Phoenician imprint displacing the Hellenocentric model of the ancient world

*How to Be* Adam Nicolson, 2023-10-17 Nicolson crafts a geography of the ancient world and a brilliant exploration of our connections to the past What is the nature of things What is justice How can I be myself How should we treat each other Before the Greeks the idea of the world was dominated by god kings and their priests Twenty five hundred years ago in a succession of small eastern Mediterranean harbor cities a few heroic men and women decided to cast off mental subservience and apply their own thinking minds to the conundrums of life These great innovators shaped the beginnings of western philosophy Through the questioning voyager Odysseus Homer explored how we might navigate our way through the world Heraclitus in Ephesus was the first to consider the interrelatedness of things Xenophanes of Colophon was the first champion of civility On the Aegean island of Lesbos the early lyric poets Sappho and Alcaeus asked themselves How can I be true to myself On Samos Pythagoras imagined an everlasting soul and took his ideas to Italy where they flowered again in

surprising and radical forms The award winning writer Adam Nicolson travels with us through this transforming world and asks what light these ancient thinkers can throw on our deepest preconceptions Enhanced with maps photographs and artwork How to Be is an expedition into early ideas Nicolson takes us to the dawn of investigative thought and makes the fundamental questions of the ancient philosophers new again What are the principles of the physical world How can we be good in it And why do we continue to ask these questions It is an enthralling exhilarating journey

Josephine Quinn, 2024-09-03 An award winning Oxford history professor makes a forceful argument and tells a story with great verve The Wall Street Journal that the West is and always has been truly global Those archaic Western Civ classes so many of us took in college should be updated argues Quinn who invites us to revel in a richer more polyglot inheritance The Boston Globe AN ECONOMIST BEST BOOK OF THE YEAR LONGLISTED FOR THE CUNDILL HISTORY PRIZE In *How the World Made the West* Josephine Quinn poses perhaps the most significant challenge ever to the civilizational thinking regarding the origins of Western culture that is the idea that civilizations arose separately and distinctly from one another Rather she locates the roots of the modern West in everything from the law codes of Babylon Assyrian irrigation and the Phoenician art of sail to Indian literature Arabic scholarship and the metalworking riders of the Steppe to name just a few

examples According to Quinn reducing the backstory of the modern West to a narrative that focuses on Greece and Rome impoverishes our view of the past This understanding of history would have made no sense to the ancient Greeks and Romans themselves who understood and discussed their own connections to and borrowings from others They consistently presented their own culture as the result of contact and exchange Quinn builds on the writings they left behind with rich analyses of other ancient literary sources like the epic of Gilgamesh holy texts and newly discovered records revealing details of everyday life A work of breathtaking scholarship How the World Made the West also draws on the material culture of the times in art and artifacts as well as findings from the latest scientific advances in carbon dating and human genetics to thoroughly debunk the myth of the modern West as a self made miracle In lively prose and with bracing clarity as well as through vivid maps and color illustrations How the World Made the West challenges the stories the West continues to tell about itself It redefines our understanding of the Western self and civilization in the cosmopolitan world of today A Plural Peninsula: Studies in Honour of Professor Simon Barton ,2023-10-20 A Plural Peninsula embodies and upholds Professor Simon Barton s influential scholarly legacy eschewing rigid disciplinary boundaries Focusing on textual archaeological visual and material culture the sixteen studies in this volume offer new and important insights into the historical socio political and cultural dynamics characterising different yet interconnected areas within Iberia and the Mediterranean The structural themes of this volume the creation and manipulation of historical historiographical and emotional narratives changes and continuity in patterns of exchange cross fertilisation and the recovery of tradition and the management of conflict crisis power and authority are also particularly relevant for the postmedieval period within and beyond Iberia Contributors are Janna Bianchini Jerrilynn D Dodds Simon R Doubleday Ana Echevarra Arsuaga Maribel Fierro Antonella Liuzzo Scorpo Fernando Luis Corral Therese Martin I aki Mart n Viso Amy G Remensnyder Maya Soifer Irish Teresa Tinsley Sonia Vital Fernandez Alun Williams Teresa Witcombe and Jamie Wood See inside the book *Italy Before Rome* Katherine McDonald,2021-10-14 This book brings together sources translated from a wide variety of ancient languages to showcase the rich history of pre Roman Italy including its cultures politics trade languages writing systems religious rituals magical practices and conflicts This book allows readers to access diverse sources relating to the history and cultures of pre Roman Italy It gathers and translates sources from both Greek and Latin literature and ancient inscriptions in multiple languages and gives commentary to highlight areas of particular interest The thematic organisation of this sourcebook helps readers to make connections across languages and communities and showcases the interconnectedness of ancient Italy This book includes maps a timeline and guides to further reading making it accessible to students and other readers who are new to this subject Italy Before Rome is aimed at undergraduate and graduate students including those who have not studied the ancient world before It is also intended to be useful to researchers approaching this material for the first time and to university and schoolteachers looking for an overview of early Italian sources **Stone Age Sailors** Alan H

Simmons,2016-06-16 Over the past decade evidence has been mounting that our ancestors developed skills to sail across large bodies of water early in prehistory In this fascinating volume Alan Simmons summarizes and synthesizes the evidence for prehistoric seafaring and island habitation worldwide then focuses on the Mediterranean Recent work in Melos Crete and elsewhere as well as Simmons own work in Cyprus demonstrate that long distance sailing is a common Paleolithic phenomenon His comprehensive presentation of the key evidence and findings will be of interest to both those interested in prehistory and those interested in ancient seafaring

Chosen Legacies Linde Egberts, 2017-07-14 The urge for regional identity has not declined in the process of globalization Rather heritage is used to develop regional distinctiveness and to charge identities with a past Particularly helpful for this aim are creation stories Golden Ages or recent shared traumas Some themes such as the Roman era or the Second World War appear easier to appropriate than for example prehistory This book assesses the role of heritage in the construction of regional identities in Western Europe It contains case studies on early medieval heritage in Alsace and Euregio Meuse Rhine industrial heritage in the German Ruhr area and competing memories in the Arnhem Nijmegen region in the Netherlands It presents new insights into the process of heritage production on a regional level in relationship to processes of identity construction The theoretical analysis of heritage and regional identity is innovative as these concepts were hardly analysed in relation to each other before This book also offers insights into policy tourism spatial development and regional development to policymakers politicians designers and professionals in the heritage and tourism industries

**Assembling Early Christianity** Cavan W. Concannon, 2017-09-07 In this book Cavan W Concannon explores the growth and development of Christianity in the second century He focuses on Dionysios of Corinth an early Christian bishop who worked to build a network of churches along trade routes in the eastern Mediterranean Using archaeological evidence and analysing Dionysios fragmentary letter collection Concannon shows how various networks and collectives assembled together and how various Christianities emerged and coexisted as a result of tenuous and shifting networks Dionysios story also overlaps with key early Christian debates notably issues of celibacy marriage re admission of sinners Roman persecution and the economic and political interdependence of churches which are also explored in this study Concannon s volume thus offers new insights into a fluid emergent Christianity at a pivotal moment of its evolution

The Culture of Ships and Maritime Narratives Chryssanthi Papadopoulou, 2019-01-22 The ship transcends the descriptive categories of place vehicle and artefact it is a cosmos which requires its own cosmology This is the subject matter of this volume which falls within the broader flourishing sub field of maritime anthropology Specifically the volume first investigates the dialectic between the sea the ship and the ship dweller and shows how traits are exchanged between the three It then focuses on land dwellers their understanding of seaborne existence and their invaluable contribution to the culture of ships It shows that the romanticised views of life at sea that land

dweller's hold constitute an important aspect of the cosmology of ships and they too need to be considered if the polyvalence of ships is to be fully understood. In order for this cosmology to be written, some of the volume's contributors have travelled on ships and interviewed mariners, fishermen, boat builders and boat dwellers; others have traced the courses of ships in poems, films, philosophical texts and collective myths of genealogy and heritage. Overall, the volume shows where ships can go and how they are perceived and experienced by those living and travelling in them, watching and waiting for them, dreaming and writing about them, and finally what literal and metaphorical crews make them.

*Viet Nam* Ben Kiernan, 2017-02-17

For many Westerners, the name Vietnam evokes images of a bloody televised American war that generated a firestorm of protest and brought conflict into their living rooms. In his sweeping account, Ben Kiernan broadens this vision by narrating the rich history of the peoples who have inhabited the land now known as Viet Nam over the past three thousand years. Despite the tragedies of the American Vietnamese conflict, Viet Nam has always been much more than a war. Its long history had been characterized by the frequent rise and fall of different political formations, from ancient chiefdoms to imperial provinces, from independent kingdoms to divided regions, civil wars, French colonies and modern republics. In addition to dramatic political transformations, the region has been shaped by its environment, changing climate and the critical importance of water, with rivers, deltas and a long coastline facilitating agricultural patterns, trade and communications. Kiernan weaves together the many narrative strands of Viet Nam's multi-ethnic populations, including the Chams, Khmers and Vietnamese, and its multi-religious heritage, from local spirit cults to Buddhism, Confucianism and Catholicism. He emphasizes the peoples' interactions over the millennia with foreigners, particularly their neighbors in China and Southeast Asia, in engagements ranging from military conflict to linguistic and cultural influences. He sets the tumultuous modern period, marked by French and Japanese occupation, anticolonial nationalism, the American Vietnamese war and communist victory, against the continuities evident in the deeper history of the people's relationships with the lands where they have lived. In contemporary times, he explores this one-party state's transformation into a global trading nation, the country's tense diplomatic relationship with China and developing partnership with the United States in maintaining Southeast Asia's regional security, and its uncertain prospects for democracy. Written by a leading scholar of Southeast Asia, *Viet Nam* presents an authoritative history of an ancient land.
