Management Communication James S. O'Rourke, 2019-04-18 This textbook introduces students to the strategic communication methods that are crucial to master in order to develop into effective and ethical managers at all levels of business. Effective communication skills are necessary for success in the business world and O'Rourke has written a highly readable book filled with anecdotes and examples to engage students in the learning process. This edition includes several classic and new features. The strategic approach is integrated throughout the book, allowing students to understand how a communicated message impacts the business as a whole. Case studies throughout the book provide students with hands-on experience of scenarios they will encounter in the real world. The book includes at least three dozen fresh classroom-tested cases. An ethical thread is woven through the text, demonstrating how ethical decision making can be applied in all aspects of communication. Separate chapters on technology, including social media, intercultural communication, nonverbal communication, and conflict management provide students with the skills to building relationships and influencing stakeholders, key skills for any manager. A companion website includes comprehensive support material to teach this class, making *Management Communication* a complete resource for students and instructors.

The Planning and Management of Distance Education Greville Rumble, 2019-05-28 Originally published in 1986, *The Planning and Management of Distance Education* examines the problems faced by those who are setting up and managing distance education systems of various kinds. The book begins by considering definitions of distance education and various models which can be used to describe and understand distance education systems. The second chapter considers various general education models and relates these to distance education. The concepts introduced in the first two chapters form a background to the rest of the book. The next section looks at the aspirations of those setting up distance education systems, the economics and costs of such systems, and the process of planning a distance education system from scratch. Chapters 3-5, Chapters 6-11, consider aspects of planning and management: organisation, staffing, planning, budgeting, the management of the academic processes related to materials development, and the provision of local student services, production management, the management of materials production and distribution, operations management, the management of the delivery of student services, and the impact of new technology on production and operations management, and finally evaluation. The short concluding chapter draws together some of the themes running through the book.
