Schmitt,2024-04-22 Sullivan-esque offers a visual and historical tour of a unique but often overlooked facet of modern American architecture derived from Louis Sullivan Highly regarded in architecture for inspiring the Chicago School and the Prairie School Sullivan was an unwilling instigator of the method of facade composition later influenced by Frank Lloyd Wright William Gray Purcell and George G Elmslie that came to be known as Sullivan-esque Decorative enhancements with botanical and animal themes Sullivan s distinctive ornamentation mitigated the hard geometries of the large buildings he designed coinciding with his form follows function aesthetic Sullivan s designs offered solutions to problems presented by new types and scales of buildings Widely popular they were also widely copied and the style proliferated due to a number of Chicago based interests including the Radford Architectural Company and several

decorative plaster and terra cotta companies Stock replicas of Sullivan's designs manufactured by the Midland Terra Cotta Company and others gave distinction and focus to utilitarian buildings in Chicago's commercial strips and other confined areas such as the downtown districts of smaller towns Mass produced Sullivanesque terra cotta endured as a result of its combined economic and aesthetic appeal blending the sophistication of high architectural art with the pragmatic functionality of building design Masterfully framed by the author's photographs of Sullivanesque buildings in Chicago and throughout the Midwest Ronald E Schmitt's in depth exploration of the Sullivanesque tells the story of its evolution from Sullivan's intellectual and aesthetic foundations to its place as a form of commercial vernacular The book also includes an inventory of Sullivanesque buildings Honorable Mention recipient of the 2002 PSP Awards for Excellence in Professional Scholarly Publishing

Modern Marketing Communications Frank Jefkins, 2012-12-06 Marketing communications is a subject which has become popular in both marketing and public relations circles but sometimes with different parameters There are those who prefer to confine marketing communications to promotional activities which is mostly an academic point of view and there are those who see the subject in broader terms embracing every form of communication used in marketing which is how the subject is practised in the business world While the author has long experience as a teacher and examiner he also continues to be a professional practitioner Consequently the book aims to serve those concerned with both the academic and the professional in interpretations of marketing communications It is of course hoped that those who adopt the academic approach to the subject will eventually acknowledge that there is more to marketing communications than advertising sales promotion selling marketing research and public relations It is also necessary to realise that public relations embraces much more than the publicity in the 4Ps promotion box Without wishing to be contentious this broad approach is proposed so that communications of all kinds throughout the marketing strategy can have maximum effect Very little has been published on this subject and the book is therefore a pioneer attempt to establish the practical parameters of modern marketing communications There are so many broad and narrow interpretations of marketing communications but it is hoped that this book will be useful to teachers students and practitioners of the subject
