### TIMING CHAIN TRAIN

PDF  
Download

The 2 camshafts are driven by the timing chain via the respective sprockets. The timing chain, consisting of 122 links, is an endless chain, connecting the crankshaft sprocket with the camshaft and VVT sprockets. The timing chain is equipped with 3 mark line plates (blue) to correctly time the 3 sprockets with each other. The timing chain is tensioned by the timing chain tensioner, which has a built-in plunger with plunger springs.

Item	No. of teeth
Camshaft sprocket	50
VVT sprocket	50
Crankshaft sprocket	18

### TIMING CHAIN TENSIONER

The plunger in the timing chain tensioner directly pushes the tension lever, and the pressure automatically adjusts the timing chain tension. A cam is provided to lock the plunger in place after the engine stops. This helps prevent the timing chain from wobbling just after the engine starts. With the timing chain tensioner installed, do not crank the engine in the reverse direction. This will force the plunger to overcome the cam, or even cause other problems.
