structures on which the Australian state is founded and so Australian sovereignty itself While the response of the Rudd Government was largely ineffectual the logic underpinning it remains the best framework for guiding Australia's engagement with China into the 2020s as well as the engagement of other liberal states coming to grips with China's rise Curbing Corruption in Asian Countries Jon S. Australian Workplace Relations Julian Teicher, Peter Holland, Richard Gough, 2013-06-04 Explores workplace relations in the twenty first century and examines the Global Financial Crisis and the Fair Work Act 2009 *Embedding New Technologies into Society* Diana M. Bowman, Elen Stokes, Arie Rip, 2017-09-01 The embedding of any new technologies in society is challenging The evolving state of the scientific art often unquantifiable risks and ill defined developmental trajectories have the potential to hinder innovation and or the commercial success of a technology The are however a number of tools that can now be utilized by stakeholders to bridge the chasm that exists between the science and innovation dimensions on the one hand and the societal dimensions on the other This edited volume will draw together leading researchers from the domains of law philosophy political science public administration and the natural sciences in order to

demonstrate how tools such as for example constructive technology assessment regulatory governance and societal scenarios may be employed by stakeholders to assist in successfully embedding new technologies into society This volume will focus primarily on the embedding of two emergent and emerging technologies nanotechnologies and synthetic biology Government industry and the epistemic community continue to struggle with how best to balance the promised benefits of an emerging technology with concerns about its potential impacts There is a growing body of literature that has examined these challenges from various cultural scientific and jurisdictional dimensions There is however much work that still needs to be done this includes articulating the successes and failures of attempts to the societal embedding of technologies and their associated products This edited volume is significant and timely as unlike other books currently on the market it shall draw from real work experiences and experiments designed anticipate the societal embedding of emerging technologies This empirical work shall be supported by robust theoretical underpinnings
