

Research Paper in APA format:

- A research paper (especially one that requires APA style) is different than a term paper, a creative writing paper, a composition-style paper, or a thought paper.
- A research paper requires you to leave out any personal information (both as content or in your writing style – see below) and to focus on research findings that have been put forth previously (the Intro section), that you have looked at and how (the Purpose (hypothesis), and Method section), and what your findings were (the Results and Discussion section).
- Research papers although generally similar may have different requirements depending on the course (and more specifically the instructor). This is not meant to confuse or frustrate students, rather it comes out of the requirements for publication that vary among fields (e.g., the type of information and the way it is presented has different requirements for behavioral journals than for social psychology journals). Best advice is to follow your instructor's guidelines!
- APA style, although similar, may change over the course of time – information such as how to write the reference section has been changed from edition to edition in the APA Publication Manual

General Tips on Writing Style:

- Impersonal style – as a guideline minimize using first person (e.g., “this study was conducted...” rather than “we conducted this study...”) although there are exceptions; see the APA Publication Manual for any questions about this
- Do not include any personal statements or anecdotes (e.g., “I was interested in studying eating disorders because my sister was diagnosed with...” does not belong in a research paper!)
- Verb tense – as a guideline use past tense (e.g., “the results indicated” rather than “the results indicate”) although there are exceptions; see the APA Publication Manual for any questions about this
- Contractions – do not use contractions! (e.g., “it does not follow” rather than “it doesn't follow”)
- Biased language– keep up to date with appropriate terms, especially if you are writing a paper that involves gender, race, ethnicity, sexual orientation, etc. The APA Manual includes information about terms that are deemed appropriate for use in research papers
- Citations – be sure to cite your sources. Try to paraphrase as much as possible (as opposed to quoting)...a couple of ways to do this:

Formal Research Paper Format

Mark E. Ware, David E. Johnson

Formal Research Paper Format:

Format Influence Hugo Raines, AI, 2025-05-05 *Format Influence* explores how different communication formats specifically letters and structured essays impact persuasion and shape public opinion. It posits that the choice of format, whether a personalized letter or a formal essay, fundamentally affects how ideas are received and understood. Letters with their intimate tone can foster a direct connection, while structured essays employing logical reasoning establish authority. One intriguing insight is how letters encourage empathy, potentially leading to greater persuasiveness, while essays shape broader public opinion. The book examines the historical evolution of these formats, analyzing how they've been used in political discourse, scientific debate, and literary movements. It showcases how format influences audience perception, demonstrating that format choice goes beyond mere style. *Format Influence* progresses by first introducing core rhetorical principles, then analyzing case studies, culminating in a comparative analysis that offers practical guidelines for effective communication. Ultimately, the book aims to provide readers with a method to strategically select the most effective format to accomplish specific communication objectives. *Effective Writing and Style: An Introduction* Ripunjoy Bezbaruah, Ph.D., 2025-03-24 **Writing the Modern Research Paper** Robert Dees, 2003 *Writing the Modern Research Paper* is a practical and contemporary guide to writing research papers, offering students advice on how to think critically throughout the research process. Designed as a complete reference, this book offers a step-by-step guide to research, encouraging students to think carefully and critically about such issues as audience, topic, and thesis, as well as evaluating, integrating, and citing sources appropriately. The text covers both informative and argumentative purposes for doing research, including a full chapter on reasoning and evidence in argumentative research papers. Original and realistic student examples throughout show various approaches to the methods of planning and researching. This contemporary book offers full coverage of computer research technologies, extensive attention to the prewriting and planning stages of the assignment, and pedagogy designed to encourage students to work collaboratively. There is also unparalleled coverage of the major disciplinary documentation forms: MLA, APA, CBE, and Chicago. The book also features examples from modern research sources.
