Anchored in Place Bank, Leslie, Cloete, Nico, 2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges

Fort Hare Rhodes University College and the University of Cape Town In a political environment where black academics were under constant threat and ideas were censored she outspokenly advocated racial equality and freedom of speech her publications emphasising a common South African identity and implicitly challenging apartheid separate development This fascinating biography moves between the Eastern Cape Cambridge Tanganyika Nyasaland Northern Rhodesia and Cape Town It explores the relationship between anthropology and history and the tensions between liberalism Christianity Marxism and apartheid ideology Drawing on the letters and diaries left by Monica and Godfrey Wilson this is a powerful story about politics race war faith love and loss **ICEL2016-Proceedings of the 11th International Conference on e-**

Prioritizing Sustainability Education Joan Armon, Stephen Scoffham, Chara Armon, 2019-12-05 *Prioritizing Sustainability Education* presents theory to practice essays and case studies by educators from six countries who elucidate dynamic approaches to sustainability education Too often students graduate with exploitative consumer driven orientations toward ecosystems and are unprepared to confront the urgent challenges presented by environmental degradation Educators are prioritizing sustainability oriented courses and programs that cultivate students knowledge skills and values and contextualize them within relational connections to local and global ecosystems Little has yet been written however about the comprehensive sustainability education that educators are currently designing and implementing often across or at the edges of disciplinary boundaries The approaches described in this book expand beyond conventional emphases on developing students attitudes knowledge and behaviors by thinking and talking about ecosystems to additionally engaging students with ecosystems in sensory affective psychological and cognitive dimensions as well as imaginative spiritual or existential dimensions that guide environmental care and regeneration This book supports educators and graduate and upper level undergraduate students in the humanities social sciences environmental studies environmental sciences and professional programs in considering how to reorient their fields toward relational sustainability perspectives and practices Effects of Globalization on Education Systems and Development Macleans A. Geo-JaJa, Suzanne Majhanovich, 2016-11-04 With its comprehensive coverage and quality this provocative book is concerned with the future of developing countries in Africa Asia and Latin America By providing in depth analysis of the economic social and educational challenges of emerging states it offers an alternative roadmap to development The authors in this collection substantiate the notion that emerging states often do not participate in policy choices related to their development when faced with universalization of curriculum and internationalization of education The authors make explicit the direct and indirect effects of globalization on educational systems social equity and the path of development In demonstrating the impact of neoliberalism or market based reforms on the developing world the authors show that education without human rights is vulnerable to negative forces of globalization and internationalization The message of the book is quite pessimistic about possibilities to widen the economic space or increase freedom unless development cooperation is made possible by Helping People Help Themselves as suggested by David Ellerman The authors note that in the past the issue of emerging states as an appendage to the world economy was a

fundamental question related to colonialism but now has become a question of imperialism which needs to be examined when considering the current patterns of development
