Media Theory in Japan Marc Steinberg, Alexander Zahlten, 2017-03-09 Providing an overview of Japanese media theory from the 1910s to the present this volume introduces English language readers to Japan's rich body of theoretical and conceptual work on media for the first time The essays address a wide range of topics including the work of foundational Japanese thinkers Japanese theories of mediation and the philosophy of media the connections between early Japanese television and consumer culture and architecture's intersection with communications theory Tracing the theoretical frameworks and paradigms that stem from Japan's media ecology the contributors decenter Eurocentric media theory and demonstrate the value of the Japanese context to reassessing the parameters and definition of media theory itself Taken together these interdisciplinary essays expand media theory to encompass philosophy feminist critique literary theory marketing discourse and art provide a counterbalance to the

persisting universalist impulse of media studies and emphasize the need to consider media theory situationally Contributors Yuriko Furuhashi Aaron Gerow Mark Hansen Marilyn Ivy Takeshi Kadobayashi Keisuke Kitano Akihiro Kitada Thomas Looser Anne McKnight Ryoko Misono Akira Mizuta Lippit Miryam Sas Fabian Sch fer Marc Steinberg Tomiko Yoda Alexander Zahlten *Post-Fukushima Activism* Azumi Tamura, 2018-05-23 Political disillusionment is widespread in contemporary society In Japan the search for the outside of a stagnant reality sometimes leads marginalised young people to a disastrous image of social change The Fukushima nuclear disaster was the realisation of such an image triggering the largest wave of activism since the 1960s The disaster revealed the interconnected nature of contemporary society The protesters regretted that their past indifference to politics prefigured such a catastrophe and became motivated to protest in the streets They did not share any totalising ideology or predetermined collective identity Instead the activism provided a space for each body to encounter others who forced them to feel and think which also introduced an ethical dimension to their politics In this book Azumi Tamura proposes a concept of politics as a series of endless experiments based on creative responses to unexpected forces Instead of searching for a transcendental reference for politics she investigates an immanent force within individuals that motivates them to become involved in political action Referencing Deleuzian philosophy Tamura provides a different epistemological and ontological approach to the social movement studies She suggests social movements themselves generate knowledge about how one may live better in a complex society and where our lives are exposed to uncertainty This knowledge is neither empirical knowledge nor normative political theory of how we should live Instead social movements bring affective knowledge into politics as they offer a space for experimenting with how we might live The encounter with such knowledge galvanizes our desire for how we want to live and encourages new experiments

Philosophy of the Tourist Hiroki Azuma, 2023-05-09 An inventive philosophical study that reconsiders the figure of the tourist Tourism is a characteristically modern phenomenon yet modern thinkers have tended to deride the tourist as a figure of homogenizing globalism This philosophical study considers the tourist anew as a subject position that enables us to redraw the map of globalized culture in an era increasingly in revolt against the liberal intellectual worldview and its call for the welcome of the Other Why has the tourist proved so resistant to philosophical treatment asks Hiroki Azuma Tracing the reasons for this exclusion through the work of Rousseau and Voltaire and subsequently in Kant Carl Schmitt Alexandre Kojve Hannah Arendt and Hardt and Negri Azuma contends that the figure of the tourist has been rendered illegible by becoming ensnared in a series of misleading conceptual dichotomies and a linear model of world history In the widening gap between the infrastructure of globalization and inherited ties of local and national belonging Azuma's retheorization of the tourist presents an alternative to the choice between doubling down on local identity and roots or hoping for the spontaneous uprising of a multitude from within the great networked Empire For the tourist is the subject capable of moving most freely between the strata of the global and the local With explorations of the connection between tourism and fan fiction

contingency and misdelivery cyberspace and the uncanny and dark tourism Azuma's inventive and optimistic philosophical essay sheds unexpected new light on a mode of engagement with the world that is familiar to us all Textual Cacophony

Daniel Johnson, 2023-10-15 No detailed description available for Textual Cacophony **Investigating Google's Search Engine** Rosie Graham, 2022-12-15 What do search engines do And what should they do These questions seem relatively simple but are actually urgent social and ethical issues The influence of Google's search engine is enormous It does not only shape how Internet users find pages on the World Wide Web but how we think as individuals how we collectively remember the past and how we communicate with one another This book explores the impact of search engines within contemporary digital culture focusing on the social cultural and philosophical influence of Google Using case studies like Google's role in the rise of fake news instances of sexist and misogynistic Autocomplete suggestions and search queries relating to LGBTQ values it offers original evidence to intervene practically in existing debates It also addresses other understudied aspects of Google's influence including the profound implications of its revenue generation for wider society In doing this this important book helps to evaluate the real cost of search engines on an individual and global scale **Wild Lines and Poetic Travels**

citizens preferences and the state's willingness to enter into 120 multilateral treaties After identifying the links as a first step toward conceptualizing quasi legislative global politics the book examines how each of the 193 states manifests quasi legislative behavior by factor analyzing six instrumental variables such as treaty participation index and six policy domains of multilateral treaties including peace and trade It then discusses global change between 1989 and 2008 and conceptually and empirically examines the three theories of global politics that originated during that period the theory of power transition theory of civilizational clash and theory of global legislative politics Lastly it proposes a theory of global legislative politics Shedding fresh light on the transformative nature of multilateral treaties this book attracts researchers and students in political philosophy international law and international relations as well as practitioners and journalists Inoguchi and Le have developed a genuinely original perspective on world politics one that opens up a new research agenda for thinking about state and global actors simultaneously Anne Marie Slaughter Bert G Kerstetter 66 University Professor Emerita of Politics and International Affairs Princeton University This is one of those books that warrant a global readership given its emphasis on the implied trust that we invest in public institutions as viewed from an interdisciplinary perspective Richard J Estes Professor of Social Policy Practice University of Pennsylvania Philadelphia Pennsylvania This book is innovative and distinctive in carving out a new way to look at global legislative politics I do not know of anything that compares in this interesting and novel niche of international relations analysis William R Thompson Distinguished Professor and Rogers Chair of Political Science Emeritus Indiana University

Future Politics Jamie Susskind, 2018-09-04 Politics in the Twentieth Century was dominated by a single question how much of our collective life should be determined by the state and what should be left to the market and civil society Now the debate is different to what extent should our lives be directed and controlled by powerful digital systems and on what terms Digital technologies from artificial intelligence to blockchain from robotics to virtual reality are transforming the way we live together Those who control the most powerful technologies are increasingly able to control the rest of us As time goes on these powerful entities usually big tech firms and the state will set the limits of our liberty decreeing what may be done and what is forbidden Their algorithms will determine vital questions of social justice In their hands democracy will flourish or decay A landmark work of political theory Future Politics challenges readers to rethink what it means to be free or equal what it means to have power or property and what it means for a political system to be just or democratic In a time of rapid and relentless changes it is a book about how we can and must regain control Winner of the Estoril Global Issues Distinguished Book Prize

Transmedia Storytelling in East Asia Dal Yong Jin, 2020-04-02 This book offers a thorough investigation of the recent surge of webtoons and manga animation as the sources of transmedia storytelling for popular culture not only in East Asia but in the wider global context An international team of experts employ a unique theoretical framework of media convergence supported by transmedia storytelling alongside historical and textual analyses to examine the ways in which webtoons and anime become some of the major sources for

transmedia storytelling The book historicizes the evolution of regional popular culture according to the surrounding digital media ecology driving the change and continuity of the manhwa industry over the past 15 years and discusses whether cultural products utilizing transmedia storytelling take a major role as the primary local cultural product in the cultural market Offering new perspectives on current debates surrounding transmedia storytelling in the cultural industries this book will be of great interest to scholars and students of media studies East Asian studies and cultural studies **The Anime**

Ecology Thomas Lamarre, 2018-03-13 A major work destined to change how scholars and students look at television and animation With the release of author Thomas Lamarre's field defining study The Anime Machine critics established Lamarre as a leading voice in the field of Japanese animation He now returns with The Anime Ecology broadening his insights to give a complete account of anime's relationship to television while placing it within important historical and global frameworks Lamarre takes advantage of the overlaps between television anime and new media from console games and video to iOS games and streaming to show how animation helps us think through television in the contemporary moment He offers remarkable close readings of individual anime while demonstrating how infrastructures and platforms have transformed anime into emergent media such as social media and transmedia and launched it worldwide Thoughtful thorough illustrations plus exhaustive research and an impressive scope make The Anime Ecology at once an essential reference book a valuable resource for scholars and a foundational textbook for students **Infocracy** Byung-Chul Han, 2022-07-19 The tsunami of

information unleashed by digitization is threatening to overwhelm us drowning us in a sea of frenzied communication and disrupting many spheres of social life including politics Election campaigns are now being waged as information wars with bots and troll armies and democracy is degenerating into infocracy In this new book Byung Chul Han argues that infocracy is the new form of rule characteristic of contemporary information capitalism Whereas the disciplinary regime of industrial capitalism worked with compulsion and repression this new information regime exploits freedom instead of repressing it Surveillance and punishment give way to motivation and optimization we imagine that we are free but in reality our entire lives are recorded so that our behaviour might be psychopolitically controlled Under the neoliberal information regime mechanisms of power function not because people are aware of the fact of constant surveillance but because they perceive themselves to be free This trenchant critique of politics in the information age will be of great interest to students and scholars in the humanities and social sciences and to anyone concerned about the fate of politics in our time **Future**

Publics Michael K. MacKenzie, 2021-06-11 Scholars have often claimed that democracies whatever their virtues are functionally short sighted The evidence is clear we have been unable to manage many long term issues including climate change nuclear waste disposal natural disaster preparedness infrastructure maintenance and budget deficits If voters and influential actors such as interest groups and corporations have dominant short term interests it may be difficult for elected politicians to act in the long term interests of society even if they think that it would be the right thing to do To solve long

term problems do we need political systems that are less democratic or even authoritarian This idea which Michael K MacKenzie calls the democratic myopia thesis is a sort of conventional wisdom it is an idea that scholars and pundits take for granted as a truth about democracy without subjecting it to adequate critical scrutiny In *Future Publics* MacKenzie challenges this conventional wisdom and articulates a deliberative democratic theory of future regarding collective action Specifically MacKenzie argues that each part of the democratic myopia problem can be addressed through democratic rather than authoritarian means At a more fundamental level once we recognize that democratic practices are world making activities that empower us to make our shared worlds together they should also be understood as future making activities Despite the short term dynamics associated with electoral democracy MacKenzie asserts that we need more inclusive and deliberative democracies if we are going to make shared futures that will work for us all **Smart Citizens, Smarter State** Beth Simone Noveck, 2015-11-02 The purpose of Smarter State is to provide both the theory and a practical blueprint for going beyond mere transparency and passive citizenship to a world in which citizenship is active and institutions are open by default Such openness and collaboration are essential if democratic societies are to meet the challenges of today and tomorrow Preface [The New Real](#) Jonathan E. Abel, 2023-01-31 Unlocking a vital understanding of how literary studies and media studies overlap and are bound together A synthetic history of new media reception in modern and contemporary Japan The New Real positions mimesis at the heart of the media concept Considering both mimicry and representation as the core functions of mediation and remediation Jonathan E Abel offers a new model for media studies while explaining the deep and ongoing imbrication of Japan in the history of new media From stereoscopy in the late nineteenth century to emoji at the dawn of the twenty first Abel presents a pioneering history of new media reception in Japan across the analog and digital divide He argues that there are two realities created by new media one marketed to us through advertising that proclaims better faster and higher resolution connections to the real and the other experienced by users whose daily lives and behaviors are subtly transformed by the presence and penetration of the content carried through new media Intervening in contemporary conversations about virtuality copyright copycat violence and social media each chapter unfolds with a focus on a single medium or technology including 3D photographs the phonograph television videogames and emoji By highlighting the tendency of the mediated to copy the world and the world to copy the mediated The New Real provides a new path for analysis of media culture and their function in the world *Computer Games As Landscape Art* Peter Nelson, 2023-08-31 This book proposes that computer games are the paradigmatic form of contemporary landscape and offers a synthesis of art history geography game studies and play Like paint on canvas the game engine is taken as the underlying medium and using the Valve Source Engine as the primary case study it analyses landscapes according to the technical economic and cultural features this medium affords It presents the single player first person shooter Half Life 2 as a Promethean safari examines how the economics of gambling and product placement shaped the eSports landscapes of Counter Strike and reveals how

sandboxes such as Garry's Mod visualise the radical landscape of Web 2.0 This book explores how our relationship to the environment is changing how we express this through computer games and how we can move beyond examining artistic influences on games to examining how historical connections flow through games and the history of landscape images

Intelligent and Autonomous: Transforming Values in the Face of Technology, 2023-08-28 This book uses case analyses and industry insights and blends them with forays into philosophy and ethics to conceptualise the mismatch between human values and the values inherent in an increasingly technologized world Bringing together contributors from the disciplines of law politics philosophy and communication studies this volume develops an interdisciplinary vocabulary for thinking about the questions and antinomies of human technology interaction while also resisting any deceptively straightforward synthesis The topics discussed include the competition over and regulation of technology the harm induced by autonomous technologies and the place and role of humans in a world that is undergoing rapid and radical change

Japanese Literary Theories Yasusuke Oura, 2024-10-15 Japanese Literary Theories An Anthology is the English translation of the 2017 volume edited by Yasusuke Oura Nihon Bungaku Riron Ansorōjii which grew from a unique collaboration between scholars of Western literatures and scholars of modern Japanese literature Its eight thematic chapters on various aspects of literary theory each contain excerpts from representative texts by Japanese intellectuals discussed against the background of Japan's ongoing negotiations with foreign ideas The anthology offers a comprehensive image of the development of Japanese literary theories from the beginning of the Meiji period in 1868 and up to the present day The translation of this anthology another collaborative project brings to the English speaking reader heretofore untranslated pieces by Japanese critics scholars and creative writers providing a point of entry into a variety of intellectual discourses from modern and contemporary Japan It enriches the repertoire of literary theories available in English while shedding light on the ways in which literature and literary theory travel back and forth within various linguistic spheres serving as central loci of intellectual negotiation
