

HUMAN PEDIGREES

By studying a human pedigree, you can determine whether a trait is dominant or recessive. To interpret the three pedigrees below, use the same key shown at the right. Of course, the individual with the trait could be homozygous dominant or heterozygous dominant.

A. The pedigree shows the inheritance of attached earlobes for four generations.

Is the trait for attached earlobes, versus free earlobes, dominant or recessive?

_____ How do you know? _____

B. The pedigree shows the inheritance of tongue rolling.

Is this trait dominant or recessive? _____ Explain. _____

C. This pedigree shows the inheritance of colorblindness, a sex-linked trait.

Is this trait dominant or recessive? _____ Is the mother of the colorblind girl in the F₃ generation colorblind, a carrier, or a person with normal color vision?

_____ Explain. _____

Pharoah, Simon Sanderson, Ron Zimmern, 2007-05-17 Genetics Health Care and Public Policy is an introduction to the new discipline of public health genetics It brings together the insights of genetic and molecular science as a means of protecting and improving the health of the population Its scope is wide and requires an understanding of genetics epidemiology public health and the principles of ethics law and the social sciences This book sets out the basic principles of public health genetics for a wide audience from those providing health care to those involved in establishing policy The emphasis throughout the text is on providing an accessible introduction to the field The content moves from the basic concepts including definitions and history through chapters on genetics genetic technology epidemiology genetics in medicine genetics in health services ethical legal and social implications to the implications for health policy It provides one stop introductory coverage of this rapidly developing and multidisciplinary field Instrumental Biology, Or The Disunity of Science Alexander

Rosenberg, 1994-11 Do the sciences aim to uncover the structure of nature or are they ultimately a practical means of controlling our environment In Instrumental Biology or the Disunity of Science Alexander Rosenberg argues that while physics and chemistry can develop laws that reveal the structure of natural phenomena biology is fated to be a practical instrumental discipline Because of the complexity produced by natural selection and because of the limits on human cognition scientists are prevented from uncovering the basic structure of biological phenomena Consequently biology and all of the disciplines that rest upon it psychology and the other human sciences must aim at most to provide practical tools for coping with the natural world rather than a complete theoretical understanding of it
