Second World War British Military Camouflage offers an original approach to the cultures and geographies of military conflict through a study of the history of camouflage Isla Forsyth narrates the scientific biography of Dr Hugh Cott 1900 1987 eminent zoologist and artist turned camoufleur and entwines this with the lives of other camouflage practitioners to trace the sites of camouflage s developments Moving through the scientists fieldsite the committee boardroom the military training site and the soldiers battlefield this book uncovers the history of this ambiguous military invention and subverts a long dominant narrative of camouflage as solely a protective technology This study demonstrates that as camouflage transformed battlefields into unsettling theatres of war there were lasting consequences not only for military technology and knowledge but also for the ethics of battle and the individuals enrolled in this process Index and Guide to Government Sources of Supply United States. Ferrigno, 2002 **Power Lines** Andrew Needham, 2016-09-13 How high energy consumption transformed postwar Phoenix and deepened inequalities in the American Southwest In 1940 Phoenix was a small agricultural city of sixty five thousand and the Navajo Reservation was an open landscape of scattered sheepherders Forty years later Phoenix had blossomed into a metropolis of 1 5 million people and the territory of the Navajo Nation was home to two of the largest strip mines in the world Five coal burning power plants surrounded the reservation generating electricity for export to Phoenix Los Angeles and other cities Exploring the postwar developments of these two very different landscapes Power Lines tells the story of the far reaching environmental and social inequalities of metropolitan growth and the roots of the contemporary coal fueled climate change crisis Andrew Needham explains how inexpensive electricity became a requirement for modern life in Phoenix driving assembly lines and cooling the oppressive heat Navajo officials initially hoped energy development would improve their lands too but as ash piles marked their landscape air pollution filled the skies and almost half of Navajo households remained without electricity many Navajos came to view power lines as a sign of their subordination in the Southwest Drawing together urban environmental and American Indian history Needham demonstrates how power lines created unequal connections between distant landscapes and how environmental changes associated with suburbanization

reached far beyond the metropolitan frontier Needham also offers a new account of postwar inequality arguing that residents of the metropolitan periphery suffered similar patterns of marginalization as those faced in America s inner cities Telling how coal from Indian lands became the fuel of modernity in the Southwest Power Lines explores the dramatic effects that this energy system has had on the people and environment of the region Documents of the Assembly of the State of New York New York (State).
