Educational Policy Evaluation through International Comparative Assessments Rolf Strietholt, Wilfried Bos, Jan-Eric Gustafsson, Monica Rosén, 2014 One of the most salient findings from the field of education is that there are huge national differences in student achievement as shown in international comparative studies like PISA and TIMSS The shockingly large gap between the highest performing countries

mostly in East Asia and many European countries corresponds to a difference in attainment of two years of schooling. Although this finding has been replicated in several studies the reasons for and consequences of such differences are currently not well understood. This book is a collection of essays and studies by leading experts in international comparative education who demonstrate how international comparative assessments can be used to evaluate educational policies. The volume is organized into two parts that address first theoretical foundations and methodological developments in the field of international assessments and second innovative substantive studies that utilize international data for policy evaluation studies. The intention of this book is to revisit the idea of using the world as an educational laboratory both to inform policy and to facilitate theory development.

Proceedings of the 2023 8th International Conference on Modern Management and Education Technology (MMET 2023) Hafizoah Kassim, Nadeem Malik, Premkumar Rajagopal, Manjet Kaur Mehar Singh, 2023-11-27. Untangled Web David Graham, 2014-09-15. The internet and world wide web are revolutionizing many aspects of our lives and have become an accepted part of socioeconomic experience in developed countries. For entertainment, shopping, banking, establishing friendships, seeking information and so on, the web is the first port of call for an increasing number of people. A few in education have been quick to see the potential of the web as a platform for delivering a variety of teaching and learning materials. Many more, however, would like to make use of the web but lack either the time or the skills or both. Untangled Web provides a guide for those wishing to develop their own teaching and learning resources on the web, whether for local, open or distance learning. By using this book, potential web educators can acquire some of these basic skills and save time by drawing on the experiences of the authors and avoiding the pitfalls and problems that they have encountered. The authors have gained considerable expertise in devising, designing, constructing, testing, adapting and evaluating their own web based instruction packages which have been developed over a number of years and involve a

variety of subject areas Untangled web is therefore very much focused on practical experience and while it is primarily aimed at teachers in further and higher education schoolteachers interested in using the web as a teaching and learning medium will find it useful Untangled Web has been written by an experienced team from the Department of International Studies at the Nottingham Trent University David Graham teaches geography and information technology Jane McNeil is Faculty webmaster and teaches medieval history and information technology Lloyd Pettiford teaches international relations
