living for its people Iraq's high levels of fragility and conflict reinforced by high oil dependency hinder the country's prospects for economic reform and growth Despite Iraq's existing sociopolitical and economic environment three encouraging messages emerge from this report First there is a peace dividend in Iraq Iraq's per capita GDP was about one fifth lower in 2018 than it would have been if not for the conflict beginning in 2014 Thus maintaining peace can by itself be a strong driver of growth Second Iraq has latent export potential for a variety of goods that if tapped could diversify the country's economy raise living standards and boost economic resilience Third Iraqi agriculture could be revived to serve as a pillar of a more diversified and private sector led economy
