CLASS Gateway

The CLSS Gateway is Honeywell Fire's interface connecting to a Honeywell fire system panel or network, serving as a portal between the panel, the cloud, and peripheral devices.

The C-100 Gateway module enables the system host to communicate with a network of up to 100 nodes and transforming the data to the Internet. An. Gateway Service (C-100) is used. The gateway board can be connected with the C-100 board, which provides computer, printer, 2-megabyte storage, and an output device (e.g., plotter). The C-100 Gateway is a plug-in module for the C-100 Gateway.
