Flammable Australia Ross A. Bradstock,Jann E. Williams,Malcolm A. Gill,2002 Fire is pivotal to the functioning of ecosystems in Australia affecting the distribution and abundance of the continent s unique and highly diverse range of plants and animals Conservation of this natural biodiversity therefore requires a good understanding of scientific processes involved in the action of fire on the landscape This book provides an up to date synthesis of current knowledge in this area and its application in contemporary land management Central to the discussion is an exploration of the concept of the fire regime and its interactions with biodiversity Manual of Romance Phonetics and Phonology Christoph Gabriel,Randall Gess,Trudel Meisenburg,2021-11-22 This handbook is structured in two parts it provides on the one hand a comprehensive synchronic overview of the phonetics and phonology including prosody of a breadth of Romance languages and focuses on the other hand on central topics of research in Romance segmental and suprasegmental phonology including comparative and diachronic perspectives Phonetics and phonology have always been a core discipline in Romance linguistics the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas

projects and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages This rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into incipient ongoing or concluded processes of phonological change The volume can be read both as a state of the art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology
