The Oxford Handbook of Megaproject Management Bent Flyvbjerg, 2017-04-13 The Oxford Handbook of Megaproject Management provides state of the art scholarship in the emerging field of megaproject management Megaprojects are large complex projects which typically cost billions of dollars and impact millions of people like building a high speed rail line a megadam a national health or pensions IT system a new wide body aircraft or staging the Olympics The book contains 25 chapters written especially for this volume covering all aspects of megaproject management from front end planning to actual project delivery including how to deal with stakeholders risk finance complexity innovation governance ethics project breakdowns and scale itself Individual chapters cover the history of the field and relevant theory from behavioral economics

to lock in and escalation to systems integration and theories of agency and power All geographies are covered from the US to China Europe to Africa South America to Australia as are a wide range of project types from hard infrastructure to soft change projects In depth case studies illustrate salient points The Handbook offers a rigorous research oriented up to date academic view of the discipline based on high quality data and strong theory It will be an indispensable resource for students academics policy makers and practitioners

Innovative Production And Construction: Transforming Construction Through Emerging Technologies Wu Peng, 2019-05-03 Throughout the 38 chapters this must have volume outlines essential information about the implementation of emerging technologies from building information modeling and 3D printing to life cycle assessment and information technology in construction and engineering projects It covers practical case studies to demonstrate the implementation of emerging technologies in a compact style ensuring that practitioners can adopt these methods to realize immediate benefits in productivity safety and performance improvement

The Governance of Energy Megaprojects Benjamin K. Sovacool, C. J. Cooper, 2013-07-01 Benjamin Sovacool and Christopher Jon Cooper have produced an astonishing and well written book based on extensive original research in twelve countries They explore the technical social political and economic dimensions of four energy megaprojects The large scale of megaprojects always appears to complicate the decision making process and often causes failures Megaprojects may even reinforce corruption and erode democracy It highlights that today's experiences can be explained by statements by Aristotle and Einstein who argue both in their own way that it is always wise to take the limits of size into account and to reduce the size of projects wherever this is possible For everybody involved in megaprojects this book must be read Hugo Priemus Delft University of Technology The Netherlands Based on extensive original research this book explores the technical social political and economic dimensions of four Asian energy megaprojects a regional natural gas pipeline network in Southeast Asia a series of hydroelectric dams on the island of Borneo an oil pipeline linking Europe with the Caspian Sea and a very large solar energy array in the Gobi desert This book investigates why energy megaprojects fail to deliver their promised benefits It offers the first comprehensive assessment of the complicated dynamics driving and constraining megaprojects initiated in the rapid scramble for energy resources and efforts to improve energy security The authors approach the assessment of megaprojects from a socio technical angle emphasizing broad issues of political leadership regulation financing interest group opposition and environmental impact as well as conventional technological factors such as engineering design and project management The Governance of Energy Megaprojects will prove insightful for academics concerned about energy policy energy security environmental impact and technology assessment But the book should prove equally compelling to those engaged in the practical management and implementation of large scale energy projects anywhere in the world

Product and Process Design Jan Harmsen, André B. de Haan, Pieter L. J. Swinkels, 2024-05-20 Product and process design driving sustainable innovation is the 2nd edition of a comprehensive textbook for product and process design courses at BSc MSc EngD and PhD

level It covers both heuristics based design methods as well as systems engineering approaches It contains specific methods to co design products and processes so that both designs are better than when these designs are made separately This integrated combination makes the book unique For making designs that contribute to the Sustainable Development Goals of the United Nations specific methods are provided for the People Planet and Prosperity dimensions This second edition of the book includes examples and exercises for each design method which makes it very suitable for teaching purposes The book is furthermore of interest to industrial process and product developers for many industry branches as it provides methods for design modelling and experimental validation for each innovation stage It is also very useful for R D managers as it provides guidelines for essential activities in each innovation stage discovery concept feasibility development detailed engineering leading to successful implementations of new processes and new products

Multiphase Reactors Jan Harmsen, René Bos, 2023-04-27 This Multiphase Reactors book is about fundamentals selection design development scale up and applications of two and three phase reactors It is a graduate textbook focused on creating understanding of the fundamentals as much as possible without resorting to mathematics It also is full of real life industrial applications and examples from the authors own experiences The target audience comprises students and industrial practitioners who may or may not have had formal training in chemical reaction engineering Each chapter explains the subject and contains take home messages examples worked out cases quiz questions and exercises
