Industry 4.0 and Digitization Ulrich Hilpert, 2022-06-15 This book includes studies on regions industries and tendencies of industrial change and spatial concentration of competences and industrial potentials The chapters in this volume provide for discussions concerning a wider understanding of situations related to Industry 4 0 and digitization It also reaches out further than towards technology and economy because it includes regional and metropolitan societies workforces and the divergencies of effects and opportunities Industry 4 0 and digitization are new transformations for regions and metropolises where technologies are applied but regionally can appear as a continuation of innovative processes where it is developed The divergent presence of competences creates a selectivity process among regions There are individual industry location nexuses formed out of competences of industries labour force and research which are complemented by public policies providing support towards such adaptation of innovation and change Regional societies formed from skilled and educated labour become an important basis for participation in innovation and supply chains Since smart factories widely can be managed remotely this also shows a concentration of decision making Simultaneously it forms a polycentric de concentration indicating some more important locations as central within the networks These systematic changes continue to deepen over time While public policies may match innovative opportunities at the appropriate moment they also contribute to a continuation of uneven development and divergent societal tendencies Industry 4 0 and digitization indicate a wide and selective change of organization associated with new technologies and innovation While some regions and metropolises can continue to build both innovative competences and innovative societies based on innovative labour force others will participate because of their position in supply chains The chapters in this book were originally published as a special issue of the journal European Planning Studies

DESIGN, SYNTHESIS AND CONTROL OF A MECHANICAL SERVO PRESS: AN INDUSTRIAL APPLICATION , Abstract Due to precision flexibility simplicity in construction easy control higher speed and lower energy consumptions servo presses have recently become popular in metal forming applications Servo press technology combines the advantages of hydraulic and conventional mechanical presses without their drawbacks This study presents design construction and demonstration of a servo crank press system for metal forming operations The research involves kinematics and motion optimization dynamic modeling structural design and analysis servo motor selection automation and control and operational performances of the servo press The press used in this work has a load capacity of 50 ton and stroke capacity of 200 mm Firstly optimized trajectories of ram scenarios are generated Then dynamic modeling using Lagrange approach is presented Next structural model is constructed and Finite Element Analysis FEA of press parts are performed within safety limits A servo motor with a reduction unit is selected based on dynamic model After that a new automation system is developed and Cascade Feed Forward CasFF control is applied Moreover four motion scenarios crank dwell link and soft motion are employed for the performance assessment of press Finally the dynamic model is verified by the

experimental results The research study is carried out under support and grant of an industrial project aiming to provide know how to industry and researchers Key Words Servo crank press metal forming motion design dynamic modeling system control *IEEE International Symposium on Industrial Electronics Proceedings* ,2001 **The Next Production**

Xing Fu,Tijmen Euser,Shu-Wei Huang,Nicolas Joly,2022-12-19 State-Firm Coordination and Upgrading

Angela Garcia Calvo,2021-08-19 Since the 1980s Spain and South Korea have experienced a dramatic transformation from middle income to advanced economies While market liberalization and globalization were important forces for change and while states continue to be central in the organization of the Spanish and South Korean economies the liberal and the developmental state perspectives do not provide an understanding of critical elements of these transformations Building on a combination of historical institutionalism and international business literature this book shows that upgrading was underpinned by cooperative models based on interdependencies and quid pro quo exchanges between national governments and large firms The negotiated nature of these arrangements opened the door to institutional variation and enabled Spain and South Korea to pursue different strategies Spain pursued an integrational approach based on foreign direct investment technological outsourcing and regional integration South Korea pursued a techno industrial strategy that prioritized self sufficiency and the development of local technological capacity Both strategies enabled Spanish and South Korean firms across multiple complex sectors to reach the efficiency frontier but resulted in different productive specializations in complex services and manufacturing respectively Through a comparative study this book shifts our perspective on the political economy of economic transformation from markets or states to state firm coordination as a driver for economic transformation from one to at least two different pathways to upgrading and from a world divided into emerging economies and world leaders to a more nuanced perspective that recognizes the perspective of new advanced economies The Code

Margaret O'Mara,2020-07-07 One of New York Magazine s best books on Silicon Valley The true behind the scenes history of the people who built Silicon Valley and shaped Big Tech in America Long before Margaret O Mara became one of our most consequential historians of the American led digital revolution she worked in the White House of Bill Clinton and Al Gore in the earliest days of the commercial Internet There she saw firsthand how deeply intertwined Silicon Valley was with the federal government and always had been and how shallow the common understanding of the secrets of the Valley s success actually was Now after almost five years of pioneering research O Mara has produced the definitive history of Silicon Valley for our time the story of mavericks and visionaries but also of powerful institutions creating the framework for innovation

from the Pentagon to Stanford University It is also a story of a community that started off remarkably homogeneous and tight knit and stayed that way and whose belief in its own mythology has deepened into a collective hubris that has led to astonishing triumphs as well as devastating second order effects Deploying a wonderfully rich and diverse cast of protagonists from the justly famous to the unjustly obscure across four generations of explosive growth in the Valley from the forties to the present O Mara has wrestled one of the most fateful developments in modern American history into magnificent narrative form She is on the ground with all of the key tech companies chronicling the evolution in their offerings through each successive era and she has a profound fingertip feel for the politics of the sector and its relation to the larger cultural narrative about tech as it has evolved over the years Perhaps most impressive O Mara has penetrated the inner kingdom of tech venture capital firms the insular and still remarkably old boy world that became the cockpit of American capitalism and the crucible for bringing technological innovation to market or not The transformation of big tech into the engine room of the American economy and the nexus of so many of our hopes and dreams and increasingly our nightmares can be understood in Margaret O Mara s masterful hands as the story of one California valley As her majestic history makes clear its fate is the fate of us all

Surveillance Law, Data Retention and Human Rights Matthew White, 2024-09-16 This book analyses the compatibility of data retention in the UK with the European Convention on Human Rights ECHR The increase in the use of modern technology has led to an explosion of generated data and with that a greater interest from law

enforcement and intelligence agencies In the early 2000s data retention laws were introduced into the UK and across the European Union EU This was met by domestic challenges before national courts until a seminal ruling by the Court of Justice in the European Union CJEU ruled that indiscriminate data retention was incompatible with EU law Since then however the CJEU has revised its position and made certain concessions particularly under the guise of national security This book focuses on data retention in the UK with the principal aim of examining compatibility with the ECHR This is explored through a variety of ways including providing an account of democracy and why secret surveillance poses a threat to it a history of data retention assessing the seriousness that data retention poses to fundamental rights the collection of rights that are affected by data retention which are crucial for a functioning democracy the implications of who can be obligated to retain and what to retain the idea that data retention is a form of surveillance and ultimately with all things considered whether this is compatible with the ECHR The work will be an invaluable resource for students academics researchers and policy makers working in the areas of privacy human rights law and surveillance

New Advances in Electrocochleography for Clinical and Basic Investigation Jeffery T. Lichtenhan, Martin Pienkowski, Oliver F. Adunka, 2018-07-09 Electrocochleography ECochG is an approach for objective measurements of physiologic responses from the inner ear Measurements have classically been made from electrodes placed in the outer ear canal on the tympanic membrane the round window niche or inside the cochlea Recent innovations have led to ECochG being used for exciting new purposes that drive clinical practice and contribute to the basic understanding of inner ear physiology Cochlear implant recording electrodes can monitor the preservation of residual low frequency acoustic hearing both in the operating room and post operatively ECochG measurements can quantify differential effects of inner ear surgery or other manipulations on vestibular and auditory physiology simultaneously Various attributes of cognitive neuroscience can be addressed with ECochG measurements from the auditory periphery These advances in ECochG provide a way to understand a variety of inner ear diseases and are likely to be of value to many groups in their own clinical and basic research
