Match each word to its antonym.

Zayne and Xavi went exploring last Saturday. Zayne carried a net and a bag to put specimens in. Xavi ran ahead and stuck his nose into a bush searching. Zayne followed behind bending to grab a small, red and black, winged critter. Zayne looked up, held out his hand, and decided to put on his wide brimmed hat and jacket. He tucked the specimen bag under his jacket so it wouldn't get wet.

When the sun came back out and the clouds moved away, Zayne and Xavi sat down for lunch. Zayne had a ham sandwich, and Xavi had a big, juicy steak bone. After lunch was finished, the boys trotted on home and observed their new pet. Later that day, the two played catch while the sun set. Summer was over, and Zayne had to get up early tomorrow.

- What do you know about Xavi?
- Why do you think Zayne has to get up early?
- Why did Zayne put on a hat and jacket?
- What did Zayne and Xavi go out to collect?
- What kind of critter Zayne find?
- What do you think might happen next?

combinatorial procedures to build a reference set in which we place the data The chosen test statistics lead to original extensions such as the geometric interpretation of the observed level and the construction of a compatibility region Features Defines precisely the object under study in the context of multidimensional procedures that is clouds of points Presents combinatorial tests and related computations with R and Coheris SPAD software Includes four original case studies to illustrate application of the tests Includes necessary mathematical background to ensure it is self contained This book is suitable for researchers and students of multivariate statistics as well as applied researchers of various scientific disciplines It could be used for a specialized course taught at either master or PhD level *Everything School Leaders Need to Know About Assessment* W.
