Decision Making Under Uncertainty and Constraints Martine Ceberio, Vladik Kreinovich, 2023-01-03 This book shows on numerous examples how to make decisions in realistic situations when we have both uncertainty and constraints In most

these situations the book's emphasis is on the why question i.e. on a theoretical explanation for empirical formulas and techniques. Such explanations are important; they help understand why these techniques work well in some cases and not so well in others and thus help practitioners decide whether a technique is appropriate for a given situation. Example of applications described in the book ranges from science biosciences geosciences and physics to electrical and civil engineering education psychology and decision making and religion and of course include computer science AI in particular eXplainable AI and machine learning. The book can be recommended to researchers and students in these application areas. Many of the examples use general techniques that can be used in other application areas as well so it is also useful for practitioners and researchers in other areas who are looking for possible theoretical explanations of empirical formulas and techniques. *ENC Focus*, 2000 The World of Science Education, 2009-01-01. Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world. These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel Arab States and Sub Saharan Africa. The focus of this Handbook is on science education in Arab states and the scholarship that most closely supports this program. The reviews of the research situate what has been accomplished within a given field in an Arab rather than an international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts. The approach allows readers to review what has been done and accomplished what is missing and what might be done next.
