The Public Relations Strategic Toolkit presents guidance to instruct and educate students and professionals of public relations and corporate communications. Alison Theaker and Heather Yaxley cover every aspect of critical practice, including definitions of public relations, key theoretical concepts, and both original and established methodological approaches. Case studies and interviews are featured to provide real-world context and advice for professional development. The new edition is fully revised with brand new case studies and updated content which reflect significant developments in theory and contemporary practice. It puts particular emphasis on the use of technology, including automation and social media, in current public relations planning, corporate communications, and stakeholder engagement. The book is divided into four parts covering the profession, public relations planning, corporate communication, and stakeholder engagement. Features include definitions of key terms, contemporary case studies, interviews with practitioners, handy checklists, practical activities, and assignments. By combining theory and practice with an invaluable insight from experts in the field, this guide will introduce readers to all the professional skills needed for a career in public relations.

**Artificial Intelligence for Sustainable Finance and Sustainable Technology** Abdalmuttaleb M. A. Musleh Al-Sartawi, 2022-01-01. This book shows latest research on artificial intelligence for sustainable technology. ICGER 2021 was organized by the Accounting, Finance, and Banking Department at Ahlia University, Bahrain, and was conducted on the 15th and 16th of September. The strategic partners included the University of Jordan, the Bahrain Economists Society, the Association of Chartered Certified Accountants (ACCA), Al Barka Banking Group, and the International Computer Auditing Education Association (ICAEA). The theme of the ICGER 2021 centered around artificial intelligence for sustainable finance and sustainable technology. Accordingly, the papers presented at the conference provided a holistic view of sustainable finance, sustainability, AI, financial technology, cybersecurity, blockchain, CSR, and governance. This book, unlike ever before, brings together intelligence applications of new technologies and the sustainability requirements in the era of the digital economy, with special attention given to the opportunities, challenges, for education, business growth, and economic progression of nations, which will help societies, economists, financial managers, engineers, ICT specialists, digital managers, data managers, policymakers, regulators, researchers, academics, and students to better understand use and control AI applications and financial technologies to develop future strategies and to achieve sustainable development goals.

**International Financial Management** Charles N. Henning, William Pigott, Robert Haney Scott, 1978

*International Financial Management* Cheol Eun, Bruce G. Resnick, 2007

International Financial Management combines the fundamental concepts of international finance with solid practical applications This combination has made it the book of choice at a variety of institutions including top business schools such as Wharton Stanford Northwestern and INSEAD Neither superficial nor overly theoretical Eun and Resnick's approach offers a conceptually solid yet still relevant treatment of international financial topics that puts students on the right track to becoming effective global financial managers

*The Law and Structure of the International Financial System* John H. Friedland, 1994-04-21

The major themes of financial regulation in the U S the EEC and Japan are discussed in four interwoven but independent essays The central focus is the protection of the financial system by insuring prudential rules against systemic risks particularly through promoting capital adequacy by international and national agreement and with due consideration to the distinction between the banking and securities business The work concludes with the assertion that international harmonization of regulation is necessary for the long run efficiency of financial markets

### **Advances in Credit Risk Modeling and Management**

Frédéric Vrans, 2020-07-01 Credit risk remains one of the major risks faced by most financial and credit institutions It is deeply connected to the real economy due to the systemic nature of some banks but also because well managed lending facilities are key for wealth creation and technological innovation This book is a collection of innovative papers in the field of credit risk management Besides the probability of default PD the major driver of credit risk is the loss given default LGD In spite of its central importance LGD modeling remains largely unexplored in the academic literature This book proposes three contributions in the field Ye Bellotti exploit a large private dataset featuring non performing loans to design a beta mixture model Their model can be used to improve recovery rate forecasts and therefore to enhance capital requirement mechanisms Francois uses instead the price of defaultable instruments to infer the determinants of market implied recovery rates and finds that macroeconomic and long term issuer specific factors are the main determinants of market implied LGDs Cheng Cirillo address the problem of modeling the dependency between PD and LGD using an original urn based statistical model Fadina Schmidt propose an improvement of intensity based default models by accounting for ambiguity around both the intensity process and the recovery rate Another topic deserving more attention is trade credit which consists of the supplier providing credit facilities to his customers Whereas this is likely to stimulate exchanges in general it also magnifies credit risk This is a difficult problem that remains largely unexplored Kanapickiene Spicas propose a simple but yet practical model to assess trade credit risk associated with SMEs and microenterprises operating in Lithuania Another topical area in credit risk is counterparty risk and all other adjustments such as liquidity and capital adjustments known as XVA Chataignier Crpey propose a genetic algorithm to compress CVA and to obtain affordable incremental figures Anagnostou Kandhai introduce a hidden Markov model to simulate exchange rate scenarios for counterparty risk Eventually Boursicot et al analyzes CoCo bonds and find that they reduce the total cost of debt which is positive for shareholders In a nutshell all the featured papers contribute to shedding light on various aspects of credit risk management that have so far largely remained unexplored
