Computational Statistics and Applications Ricardo López-Ruiz,2022-04-06 Nature evolves mainly in a statistical way Different strategies formulas and conformations are continuously confronted in the natural processes Some of them are selected and then the evolution continues with a new loop of confrontation for the next generation of phenomena and living beings Failings are corrected without a previous program or design The new options generated by different statistical and random scenarios lead to solutions for surviving the present conditions This is the general panorama for all scrutiny levels of the life cycles Over three sections this book examines different statistical questions and techniques in the context of machine learning and clustering methods the frailty models used in survival analysis and other studies of statistics applied to diverse problems **Application and Role of Statistics in Multi-Disciplinary Research** Dr. Sanjay Tiwari, Vinay Kumar, Dr. Ajai Pal Sharma & Dr. Anand Sharma,2021-09-09 Application and Role of Statistics in Multi Disciplinary Research Advancement in research requires multi disciplinary orientation for providing sustainable solutions to political economic social psychological or international problems and statistics has emerged as a separate discipline for enriching other disciplines of study The purpose of bringing this book is to disseminate the dissections and cross dissections of multi disciplinary philosophy and mission of the Central University of Haryana The present edited book is a compilation of selected research papers which were presented during a Two Days National Seminar on Application and Role of Statistics in Multi Disciplinary Research organised in the Central University of Haryana on 23rd 24th Oct 2013 This volume comprises mainly five sections Section 1 comprises of papers in the areas of Application of Statistics in Embryonic Economic Issues dealing with issues of crop diversification stock market volatility due to macro economic factors and the food products industry Section 2 includes research articles in Role and Application of Statistics in Business Decision Areas which focus on the issues related to financial inclusion Islamic finance risk in e transaction and retention policy Section 3 covers the articles in the areas of Emerging Dimensions of Statistics in Various Sectors covering the use of statistics in medical science engineering and designing Sections 4 is composed of the papers from the areas of Statistics in Social Science Policy Planning and Governance where papers emphasising on skill inclusion in degree curricula co operative banking and statistical challenges in law and politics are included The last Section 5 covers the research articles from the areas of Statistics in Management of Financial Services in which empirical articles on service quality in banks and health insurance aspects are added from perceptual viewpoints Though the papers have been selected from different disciplines of study an attempt is made to reflect the cross disciplinary ideological churning testified by statistical analysis empirical as well as conceptual Overall this edited volume is assimilation dissection and cross dissection of various disciplines using statistical tools and techniques Hope this edited version will serve the purpose of scholars researchers and teachers to navigate into a deep sea of multi disciplinary insights Handbook of Research on Managing and Designing Online Courses in Synchronous and Asynchronous

<u>Environments</u> Durak, Gürhan,Çankaya, Serkan,2021-12-17 In order to be successful online learning should be planned systematically It can be said that offering distance education courses without preparation and knowledge about the theoretical background can cause drawbacks While distance education has become widespread and popular it is observed that there could be problems in its application Such problems can include technical problems inability to meet the learning needs at the learners own speeds lack of communication among learners and between learners and teachers and lack of quality materials appropriate for online learning or the inclusion of materials used in traditional methods directly into online learning For successful online courses these critical aspects of distance education are important and they should be taken into account by the institutions and the instructors offering online courses The Handbook of Research on Managing and Designing Online Courses in Synchronous and Asynchronous Environments provides up to date knowledge and experiences regarding technologies processes and environments for online course design in distance education systems and covers topics related to the aspects of successful distance education systems with a focus on teaching and learning in online environments Focusing on topics such as instructional design and integrated systems it is an ideal guide for online course designers instructional designers curricula developers administrators educators researchers trainers and students   <u>G Families of Probability Distributions</u> Mir Masoom Ali,Irfan Ali,Haitham M. Yousof,Mohamed Ibrahim Mohamed Ahmed,2023-03-31 Statistical distributions are essential tools to model the characteristics of datasets such as right or left skewness bi modality or multi modality observed in different applied sciences such as engineering medicine and finance The well known distributions like normal Weibull gamma and Lindley are extensively used because of their simple forms and identifiability properties In the last decade researchers have focused on the more complex and flexible distributions referred to as Generalized or simply G families of probability distributions to increase the modelling capability of these distributions by adding one or more shape parameters The main aim of this edited book is to present new contributions by researchers in the field of G families of probability distributions The book will help researchers to Develop new univariate continuous and discrete G families of probability distributions Develop new bivariate continuous and discrete G families of probability distributions Derive beneficial mathematical properties such as ordinary and incomplete moments moment generating functions residual life and reversed residual life functions order statistics quantile spread ordering and entropies and some bivariate and multivariate extensions of the new and existing models using a simple type copula   <u>Optimal Decision Making in Operations Research and Statistics</u> Irfan Ali,Leopoldo Eduardo Cárdenas-Barrón,Aquil Ahmed,Ali Akbar Shaikh,2021-11-29 The book provides insights in the decision making for implementing strategies in various spheres of real world issues It integrates optimal policies in various decisionmaking problems and serves as a reference for researchers and industrial practitioners Furthermore the book provides sound knowledge of modelling of real world problems and solution procedure using the various optimisation and statistical techniques for making optimal decisions The book is meant for teachers
