Law and Moral Action in World Politics Cecelia Lynch, Michael Maurice Loriaux, 2000. Defined by custom and treaty and now increasingly embodied in charters, regulations and resolutions of international organizations, does the existence of international law point to progress in humankind's capacity for moral conduct? Or does the lack of a discernible ethical foundation in either law or political action make progress impossible to define? In *Law and Moral Action in World Politics*, the authors, activists and scholars of international law and international relations, pose these questions in new ways. Some adhere to a progressive reading of the law, others adopt a critical stance. Topics included: the function and historical evolution of the law; the cultural and intellectual assumptions of influential legal texts; and the experiences of legal activists in using law to pursue moral ends, including the rights of indigenous people and the protection of international law itself.

His research engagingly expounded upon in *UN Robust Peacekeeping* indicates that robust peacekeeping works better than traditional peacekeeping in lowering civilian killings by spoilers in violent civil wars. His book also presents the concept of a formidable barrier model of robust peacekeeping success using the game theoretical model. It makes policy recommendations to enhance the UN's capacity to protect civilians from human rights violations, including a unified coherent doctrinal definition for robust peacekeeping, an operational doctrine on the use of force and improved UN intelligence capacity.
