Built to Love Jonathan Cagan, Peter Boatwright, 2011-08-19 *Built to Love* reveals how companies can create captivating products that energize the marketplace and set the standard for what customers want and expect. Firms often hope the answer is to produce the latest high technology devices only to find that they fail to light up the marketplace. Or firms rely on ads that overstate or mislead leaving the customer disappointed and disillusioned. Instead a deeper emotional engagement between the customer and product is required regardless of whether the products are physical products, services, technologies, software systems or brands. Using a combination of industry based research and laboratory experiments the authors demonstrate that customers will richly pay for products that authentically provide emotional fulfillment. They uncover the science behind successful products that create an avid and loyal following and they present evidence that product emotions increase a product's success in the marketplace as well as a firm's success in the stock market even when the economy is down. A practical how to guide the book next shows how to analyze customers' emotional needs and translate those needs into features that galvanize customers. Throughout the book uses revealing case studies that show how to energize customers in both consumer and business to business worlds in both large and small firms *Plunkett's Automobile Industry Almanac: Automobile, Truck and Specialty Vehicle Industry Market Research, Statistics, Trends & Leading Companies* Jack W.
