Fairness in International Taxation Ira K Lindsay, Benita Mathew, 2025-02-20 This book explores the thorny normative issues raised by the changing landscape of international tax policy. Proposals for taxation of the digital economy and the OECD G20 BEPS framework promise fundamental changes in the international tax system. The book features perspectives from legal scholars, political theorists, and political philosophers on international corporate and individual taxation. Contributors advance new theories of international tax justice, develop theoretically informed reform proposals, and critique influential approaches to international tax reform. Key themes include justice in bilateral and multilateral international tax agreements, the taxation of cross-border workers, fair division of tax revenue from multinational corporations, and the fairness of the international tax policy-making process. This book provides new perspectives on leading international tax policy debates, analyses the intersection between international distributive justice and contemporary tax policy, and proposes innovative ways to meet the demands of tax justice in a global context.

E-commerce Law and Practice in Europe Ian Walden, Julia Hörnle, 2001-04-27 With the massive explosion of e-commerce and especially the use of the Internet as a transnational and instant medium for business transactions, has come a whole range of new laws and regulations and inevitably a minefield of accompanying uncertainties and potential pitfalls. So what exactly are the legal issues companies need to address and what are their implications in real terms for the business world? Find the answers in this groundbreaking study undertaken for the European Commission within the framework of the ECLIP project. With a brief to provide practical help for businesses and e-commerce initiatives, this series of cutting-edge reviews examines and evaluates the special rules designed to regulate the Internet both at a European and at national level in the Member States. It also explains the relevant technological developments and evaluates them against the legal background. This is an essential guide for legal and corporate practitioners alike as well as software developers and the consultancy community internationally. A publication of the ECLIP network.

Special Features of the UN Model Convention Anna Binder, Viktoria Wöhrer, 2019-10-01 Detailed research on the UN Model Convention's unique features. The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations. Driven by the aim to achieve consistency in the international tax treaty practice, the structure and content is to a large extent similar in the UN Model and the OECD Model. However, whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries, the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention. Compared to the OECD Model Convention, the UN Model Convention aims at giving more weight to the source principle. Popular examples are the PE definition in the UN Model, which provides for a lower threshold than Article 5 of the OECD Model, or Article 12A on Fees for Technical Services, which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non

residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and or user i e the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master s theses of the full time LL M program 2018 2019 for which Special Features of the UN Model Convention has been chosen as the general topic With this book the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD s BEPS project on the UN Model he OECD s BEPS project on the UN Model
