Andrew Jackson's Presidency Christine Zuchora-Walske, 2016-08-01 In 1829 Andrew Jackson became the seventh president of the United States the first who did not come from a wealthy east coast family Jackson led an adventurous some would say notorious life More than any president before him he sought to represent the voters at this time only white men and the common people who in his view built and sustained the nation In addition to supporting slavery Jackson's policy of forcing American Indians to move West led to disaster including the death of thousands on the Trail of Tears President Jackson left a controversial legacy that modern Americans still grapple with

Mapping Movie Magazines Daniel Biltereyst, Lies Van de Vijver, 2020-03-30 Movie magazines are crucial but widely underused sources for writing the history of films and cinema This volume brings together for the first time a wide variety of historic research of movie magazines and film trade journals reflecting on the issue of using these sources for film cinema historiography and on the impact of digitization processes Mapping Movie Magazines explores this debate from different disciplinary perspectives enlightened by case studies from the use of early film trade press to pedagogical uses of digitized periodicals The volume explores Hollywood's grip on movie magazines gender in film journalism typologies of unknown trade press and movie magazine markets and subversive Tijuana bibles

The Uncertain Image Ulrik Ekman, Daniela Agostinho, Nanna Bonde Thylstrup, Kristin Veel, 2020-04-28 Citizens of networked societies are almost incessantly accompanied by ecologies of images These ecologies of still and moving images present a paradox of uncertainties emerging along with certainties Images appear more certain as the technical capacities that render them visible increase At the same time images are touched by more uncertainty as their numbers manipulabilities and contingencies multiply With the emergence of big data the image is becoming a dominant vehicle for the construction and presentation of the truth of data

Images present themselves as so many promises of the certainty predictability and intelligibility offered by data The focus of this book is twofold It analyses the kinds of images appearing today showing how they are marked by a return to modern photographic emphases on high resolution clarity and realistic representation Secondly it discusses the ways in which the uncertainty of images is increasingly underscored within such reiterated emphases on allegedly certain visual truths This often involves renewed encounters with noise grain glitch blur vagueness and indistinctness This book provides the reader with an intriguing transdisciplinary investigation of the uncertainly certain relation between the cultural imagination and the techno aesthetic regime of big data and ubiquitous computing This book was originally published as a special issue of Digital Creativity

 Niels Brügger,2023-10-31 An original methodological framework for approaching the archived web both as a source and as
 an object of study in its own right As life continues to move online the web becomes increasingly important as a source for
 understanding the past But historians have yet to formulate a methodology for approaching the archived web as a source of
 study How should the history of the present be written In this book Niels Br gger offers an original methodological
 framework for approaching the web of the past both as a source and as an object of study in its own right While many studies
 of the web focus solely on its use and users Br gger approaches the archived web as a semiotic textual system in order to
 offer the first book length treatment of its scholarly use While the various forms of the archived web can challenge
 researchers interactions with it they also present a range of possibilities for interpretation The Archived Web identifies
 characteristics of the online web that are significant now for scholars investigates how the online web became the archived
 web and explores how the particular digitality of the archived web can affect a historian s research process Br gger offers
 suggestions for how to translate traditional historiographic methods for the study of the archived web focusing on
 provenance creating an overview of the archived material evaluating versions and citing the material The Archived Web lays
 the foundations for doing web history in the digital age offering important and timely guidance for today s media scholars

Miller,Andrew Bolton ,William

DeGregorio, Amanda Garfinkle, 2025-05-05 *Superfine Tailoring Black Style* traces the complex and vibrant legacy of menswear across three centuries of Black culture from today's hip hop aesthetic and popular street trends through its use during the Harlem Renaissance and the civil rights movement as a symbol of creative and political agency to its surprising origins as an imposed uniform for servants and enslaved people. Organized by key characteristics of dandyism that resonate across time including presence, distinction, disguise, and respectability, this fresh interpretation of a centuries-old aesthetic draws on prominent Black voices in fashion literature and art among them Dandy Wellington, Amy Sherard, Ik Ud, and Andr 3000. Self-described dandies and high fashion models feature in a stunning photo essay by artist Tyler Mitchell who also contributes evocative new photography of garments by contemporary designers such as Virgil Abloh, Pharrell Williams, and Grace Wales Bonner. These works are shown alongside historical attire worn by Black luminaries including Frederick Douglass, Alexandre Dumas père, Muhammad Ali, and Andr Leon Talley. Scholar Monica L. Miller contextualizes these objects in her text and shows how the evolution of dandy style inspired new visions of Black masculinity that use the power of clothing and dress as a means of self-expression. *Discovering and Using Historical Geographic Resources on the Web* Eva H. Dodsworth, L. W. Laliberté, 2014-06-12 Historical geographic material like maps, plans, and air photos, although collected and preserved by libraries, archives, and other heritage organizations, are often hidden from the general public. They can be difficult to find, access, and use. Fortunately, these caches of cartographic gems have been recognized and valued for their significant contribution to research. As a result, many of these collections have been recently digitized and made available to the public directly and freely online. Acting as a comprehensive guide to online historical cartographic and other visual resources, *Discovering and Using Historical Geographic Resources on the Web* provides library and archival staff and their users with information on how to locate, interpret, understand, and use these resources. Even for experts, this book can serve as a handy reference that summarizes the different types of maps published, providing comprehensive lists of where to access them. This book is written for all library staff members who answer reference questions and provide library instruction and for those who are interested in digitizing their own cartographic collections. It will also attract history buffs and scholars in environmental studies, history, earth sciences, anthropology, and more.
