Why Does Matter Matter?

by Kelly Hashway

What do trees, air, and water have in common? They all have matter. That means they take up space. You might be wondering why these things look so different if they all have matter. Everything found on Earth can be grouped into one of three states of matter: solid, liquid, or gas. In order to figure out which state of matter an object fits in, we have to examine its properties. The properties we look at are shape, mass, and volume. Mass is the amount of matter an object has, and volume is the amount of space the matter takes up.

Solids are easy to recognize. They have definite shape, mass, and volume. Trees are solids. They are made up of tiny particles called atoms. These atoms are packed closely together, and they hold the solid in a definite shape that does not change. If you look around your house, you will see lots of solids. Televisions, beds, tables, chairs, and even the food you eat.

Liquids do not have definite shape, but they do have definite mass and volume. Liquids are similar to solids because their atoms are close together, but what makes a liquid different is that those atoms can move around. Liquids can change shape by flowing. If you've ever spilled a glass of milk, then you know it spreads out across the floor. It does this because the milk is taking the shape of the floor. Since liquids do not have a definite shape of their own, they will take the shape of their containers. This is why the same amount of milk can look different in a tall glass, a wide mug, or spread out on your kitchen floor.

Solid

The atoms in a solid are packed closely together. They bond together and do not change shape.

Liquid

The atoms in a liquid are close together. They slide around.

Workbook Daniel C. Tofan, 2010-07-28 This workbook is a comprehensive collection of solved exercises and problems typical to AP introductory and general chemistry courses as well as blank worksheets containing further practice problems and questions It contains a total of 197 learning objectives grouped in 28 lessons and covering the vast majority of the types of problems that a student will encounter in a typical one year chemistry course It also contains a fully solved 50 question practice test which gives students a good idea of what they might expect on an actual final exam covering the entire material

40 Questions About Calvinism Shawn D. Wright, 2019-04-30 In 40 Questions About Calvinism church historian Shawn Wright tackles many issues about the theological system known as Calvinism Taking an irenic approach Wright explains the key doctrines while also contrasting them with Arminianism The accessible format allows readers to easily look up topics in which they re most interested including What is the difference between Calvinism and the Reformed tradition Does God love all people Did Jesus die for the sins of the whole world Can people resist the Holy Spirit Do Calvinists practice evangelism and missions Here is a book to put into the hands of such inquirers whose understanding of Calvinism may have been formed by those who caricature it The fact that each chapter is a question helps readers go straight to the issue that is dogging them Conrad Mbewe Kabwata Baptist Church Lusaka Zambia If you are a non Calvinist seeking answers about Calvinism you will find a clear and winsome presentation of the position as well as a response to some key criticisms If you are a Calvinist looking for a model of how to talk about these things with non Calvinists then you will find a helpful and humble model for explaining the Calvinist position and its points of disagreement with Arminianism in a fair minded evenhanded way Ligon Duncan Reformed Theological

Seminary **Being and God** Lorenz B. Puntel, Alan White, 2011 The main thesis of this book is that it is philosophically reasonable intelligible and appropriate to raise questions about God and to provide answers to those questions that are rational only within the framework of a conception of reality or being as a whole Buildings Matter Derrick Van Mell, 2005-07 The decision to build a building is one of the most lasting complex and stressful decisions a leader makes The stakes for the organization and the decision maker are huge Buildings Matter is a well organized and plainly written guide to architecture that is immediately useful to the CEOs directors statesmen and deans faced with the risks and opportunities of having a building designed and built
