Doctor at Heart is not just about Dr Gikonyo's life journey but it also delves into pertinent social economic and political issues at the local and global levels. The author criss crosses generations and in so doing presents their respective opportunities and challenges while at the same time advancing theories and worldviews that the reader will find very engaging. The book also brings out the author's multiple skills each of which he pursues with a passion. His authentic search for solutions to the challenges of life aptly depict him as a Doctor at heart. Notably Dr Gikonyo emphasises some of the elements of transformation that he envisages for Kenya through a never before published interview of Mwai Kibaki a transcript of which is included in the book.

*Non-Motorized Transport Integration into Urban Transport Planning in Africa* Winnie V. Mitullah, Marianne Vanderschuren, Meleckidzedek Khayesi, 2017-07-14

What challenges do pedestrians and cyclists face in cities of the developing world? What opportunities do these cities have to provide for walking and cycling? Based on in depth research conducted in Cape Town South Africa, Dar es Salaam Tanzania and Nairobi Kenya, this book explores these questions by presenting work on walking and cycling travel behaviour, the status of road safety in these cities as well as an analysis of the infrastructure for walking and cycling and the workings of the institutions responsible for planning for these modes. The book also presents case studies relating to particular opportunities and challenges such as the development and evaluation of walking bus interventions and the opportunities micro simulation of pedestrian interventions offers within a data scarce environment.

*Non motorized Transport Integration into Urban Transport Planning in Africa* demonstrates that transport and urban planning remains situated in a logic of automobile dependent transport planning and global city development. This logic of practice does not pay adequate attention to walking and cycling. It argues that a significant shift in both policy as well as political commitment is needed so as to prioritize walking and cycling as strategies for sustainable transport policy in urban Africa. This book will be a key text for practitioners and policy makers working in planning transport policy and urban development in Africa as well as students and scholars of African studies, development studies, urban geography, transport studies and sustainable development.
