and knowledge childlessness ethnocentrism and democracy cultural identity through theater Black identity in the diaspora and diasporic consciousness Using existing scholarship the chapters in this edited volume challenge our understanding of what identity entails and provide new discussions on the hitherto politicized historiography of some identities in Africa

Equality in Kenya's 2010 Constitution Victoria Miyandazi, 2021-02-25 This book makes a significant contribution to the ongoing global conversations on the various understandings of equality It illuminates the many ways in which diverse equality guarantees clash or are interrelated It also sets out principled approaches on how they can be coherently interpreted to address the myriad inequalities in Kenya Taking a comparative approach the book considers how other jurisdictions including the United States United Kingdom Canada South Africa India and Botswana have approached the conceptualisation interpretation and application of various equality concepts The book focuses on important issues such as transformative constitutionalism in relation to the interpretation of Kenya's 2010 Constitution expanding the list of enumerated grounds for non discrimination affirmative action accommodating religious and cultural diversity versus gender equality the interrelation between socio economic rights and status based equality *The Refugee Crisis and Religion* Luca Mavelli, Erin Wilson, 2016-12-01 The current refugee crisis sweeping Europe and much of the world closely intersects with largely neglected questions of religion Moving beyond discussions of religious differences what can we learn about the interaction between religion and migration Do faith based organisations play a role within the refugee regime How do religious traditions and perspectives challenge and inform current practices and policies towards refugees This volume gathers together expertise from academics and practitioners as well as migrant voices in order to investigate these interconnections It shows that reconsidering our understanding and approaches to both could generate creative alternative responses to the growing global migration crisis Beginning with a discussion of the secular religious divide and how it shapes dominant policy practices and counter approaches to displacement and migration the book then goes on to explore and deconstruct the dominant discourse of the Muslim refugee as a threat to the secular Christian West The discussion continues with an exploration of Christian and Islamic traditions of hospitality showing how they challenge current practices of securitization of migration and concludes with an investigation of the largely unexplored relation between gender religion and migration Bringing together leading and emerging voices from across academia and practice in the fields of International Relations migration studies philosophy religious studies and gender studies this volume offers a unique take on one of the most pressing global problems of our time **Really Good Schools** James Tooley, 2021-04-12 Almost overnight a virus has brought into question America's nearly 200 year old government run K 12 school system and prompted an urgent search for alternatives But where should we turn to find them Enter James Tooley's Really Good Schools A distinguished scholar of education and the world's foremost expert on private low cost innovative education Tooley takes readers to some of the world's most impoverished communities located in some of the world's most dangerous places including India and such war torn

countries as Sierra Leone Liberia and South Sudan There in places where education experts fear to tread Tooley finds thriving private schools that government multinational NGOs and even international charity officials deny exist Why Because the very existence of low cost high quality private schools shatters the prevailing myth in the U S U K and western Europe that absent government affordable high quality schools for the poor could not exist But they do And they are ubiquitous and in high demand Founded by unheralded local educational entrepreneurs these schools are proving that self organized education is not just possible but flourishing often enrolling far more students than free government schools do at prices within reach of even the most impoverished families In the course of his analysis Tooley asks the key questions What proportion of poor children is served How good are the private schools What are the business models for these schools And can they be replicated and improved The evidence is in In poor urban and rural areas around the world children in low cost private schools outperform those in government schools And the schools do so for a fraction of the per pupil cost Ubiquity affordability quality value for money equity choice and sustainability these are the seven categories by which schooling should be judged according to Tooley In every instance one is forced to conclude that low cost non governmental entrepreneurial education as practiced by the poor around the globe contains the key to their rise to prosperity and leadership positions within their own respective cultures Alarmed by recent government barriers in education Americans can now find hope in the triumph in the face of acute adversity of these remarkable schools Because of the pandemic parents in America and Europe are discovering that the education of their children is indeed possible and likely far better without government meddling with rigid seat time mandates outdated school calendars absurd age driven grade levels and worse testing regimes And having experienced the first fruits of educational freedom parents will be increasingly open to the possibilities of ever greater educational entrepreneurship and innovation Thankfully they have Really Good Schools to show the way

The imperial state category of Native initially a mark of colonized status has been revitalized in what Sharma terms the Postcolonial New World Order of nation states Under postcolonial rule claims to autochthony being the Native people of a place are mobilized to define true national belonging Consequently Migrants the quintessential people out of place increasingly face exclusion expulsion or even extermination This turn to autochthony has led to a hardening of nationalism s Criteria for political membership have shrunk immigration controls have intensified all while practices of expropriation and exploitation have expanded Such politics exemplify the postcolonial politics of national sovereignty a politics that Sharma sees as containing our dreams of decolonization Home Rule rejects nationalisms and calls for the dissolution of the ruling categories of Native and Migrant so we can build a common worldly place where our fundamental liberty to stay and move is realized

*Obstacles to Fairness in Criminal Proceedings* John D Jackson, Sarah J Summers, 2018-03-22 This volume considers the way in which the focus on individual rights may constitute an obstacle to ensuring fairness in criminal proceedings The increasingly cosmopolitan nature of criminal justice forcing legal systems with different institutional forms and practices to interact with each other as they attempt to combat crime beyond national borders has accentuated the need for systems to seek legitimacy beyond their domestic traditions Fairness expressed in terms of the right to a fair trial in provisions such as Article 6 of the European Convention on Human Rights has emerged across Europe as the principal means of guaranteeing the legitimacy of criminal proceedings The consequence of this is that criminal procedure doctrines are framed overwhelmingly in constitutional terms the protection of defence rights is necessary to restrict and legitimate the state s mandate to prosecute crime Yet there are various problems with relying solely or predominantly on defence rights as a means of ensuring that proceedings are fair or legitimate and these issues are rarely discussed in the academic literature In this volume scholars from the disciplines of law philosophy and sociology challenge various normative assumptions underpinning our understanding of fairness in criminal proceedings
