New Words, New Meanings: Supporting the Vocabulary Transition from Primary to Secondary School Alice

Deignan, Marcus Jones, 2024-12-05 When pupils move from primary to secondary school and start to study subjects in a more specialist way they have to learn new and unfamiliar disciplinary languages in each of the numerous subjects in their timetable. These new languages include new ways of presenting ideas and hundreds even thousands of new words as well as new meanings of words they think they already know. Based on a major research project, this book explains the nature of the language challenge students face in early secondary school and shows teachers how they can make the language of their subject less daunting and more accessible for all students. Chapters explore the language of the classroom at Key Stage 2 and Key Stage 3 using written and spoken language data from everyday classrooms. Including subject specific word lists and contextual examples for English, maths, science, history and geography, chapters cover how language use is shaped by topic, context, relationships and purpose. The language features of early secondary school. Key principles for selecting vocabulary to teach. Supporting pupils with disciplinary grammar and style. Ensuring a whole school approach to language issues. Full of practical tips to make the language of curriculums less daunting and more accessible for all students, making the transition from primary to secondary school, this book will be valuable reading for teachers, educational support staff and school leaders working with children in late primary and early secondary school. **Education and Learning** Jane Mellanby, Katy

Theobald, 2014-03-31 Education and Learning offers an accessible introduction to the most recent evidence based research into teaching, learning and our education system. Presents a wide range of references for both seminal and contemporary research into learning and teaching. Examines the evidence around topical issues such as the impact of Academies and Free Schools on student attainment and the strong international performance of other countries. Looks at evidence based differences in the attainment of students from different socioeconomic and ethnic backgrounds and explores the strong international performance of Finnish and East Asian students. Provides accessible explanations of key studies that are supplemented with real life case examples. *Creating Outstanding Classrooms* Oliver Knight, David Benson, 2013-10-15 This timely new book outlines a whole school approach to embedding a sustainable model of teaching and learning that puts the learner at the heart of the system. It provides an entire framework for ensuring all students achieve above their expectations, incorporating school vision, teacher professional development, assessment models, school culture, leadership and management and core classroom practices. It takes what the current research suggests does and does not work and builds it into a practical approach that has been tried, tested and proven to work. Each section incorporates the research, a model of how this can be embedded across a school and then a training section that allows senior leaders in schools to teach the skill set to others to ensure it can be embedded and reviewed. Covering all aspects of teaching and learning, including curriculum design, teacher practices, assessment and leadership, the book features a clear planning framework that is easy to implement, subject
