Space Science and Public Engagement Amy Paige Kaminski,2021-06-04 Space Science and Public Engagement 21st Century Perspectives and Opportunities critically examines the many dimensions of public engagement with space science by exploring case studies that show a spectrum of public

engagement formats ranging from the space science community's efforts to communicate developments to the public to citizenry attempting to engage with space science issues. It addresses why public engagement is important to space science experts, what approaches they take, how public engagement varies locally, nationally, and internationally, and what roles non-experts have played in shaping space science. Space scientists, outreach specialists in various scientific disciplines, policymakers, and citizens interested in space science will find great insights in this book that will help inform their future engagement strategies. Critically examines how expert organizations and the space science community have sought to bring space science to the public. Examines how the public has responded and in some cases self-organized to opportunities to contribute to space science. Outlines future engagement interests and possibilities.

Elements of Quantum Optics Brice Scott, 2019-09-03. The book gives a broad coverage of the basic elements necessary to understand and carry out research in quantum optics. It presents a variety of theoretical tools and important results for two-level and semiconductor media, many of which could only be found in the original literature or in specialized monographs up to now. The text reveals the close connection between many seemingly unrelated topics. The book on Quantum Optics has been written to meet the requirement of the degree and postgraduate students. The subject matter has been discussed in such a simple way that the students will find no difficulty to understand it. Most of the examples given in the book have been selected from various university examination papers, and the book covers the syllabus of almost all the universities.
