Dallenbach, Madison Bentley, Edwin Garrigues Boring, Margaret Floy Washburn, 1926 *General Anatomy*

- *E-book* Vishram Singh, 2015-09-15 The Second Edition of this book is updated in accordance with the syllabus of Anatomy recommended by the Medical Council of India. It covers in detail fundamentals of human anatomy and builds understanding of structures, their relations and functions within the complex human body. Following recent trends of anatomy education, the book, in addition to basic information, provides knowledge on anatomical, embryological, histological, and genetic basis of clinical conditions through its feature Clinical Correlation. Written in simple and easy-to-understand language, this profusely illustrated book provides knowledge of anatomy without extraneous details, ideal for undergraduate medical and dental students. It is highly recommended for those preparing for various entrance examinations like PG entrance, USMLE, PLAB, etc. Detailed exposition on basic principles of anatomical structures and relationships and functions of these structures within the human body. Chapters on skin, superficial fascia and deep fascia, skeleton, muscular system, cardiovascular system, radiological imaging, anatomy and genetics have been revised thoroughly. Clinical Correlations integrated in the text highlighting practical application of anatomical facts have been modified extensively. Addition of new line diagrams and improvement in earlier diagrams. Addition of halftone figures to enrich the understanding of clinical correlations. Inclusion of new tables and flowcharts and revision of earlier tables. Additional information of higher academic value presented in a simple way in N.B. to make it more interesting for readers, especially aspiring postgraduates. Important facts useful for candidates appearing in various entrance examinations like PGME, USMLE, PLAB listed under Golden Facts to Remember. Multiple Choice Questions at the end of the book for self assessment.

Study Guide for Wong's Nursing Care of Infants and Children - E-Book

Marilyn J. Hockenberry, David Wilson, Linda McCampbell, 2018-09-03 Corresponding chapter by chapter to the completely reorganized and revised Wong's Nursing Care of Infants and Children 11th Edition, this study guide helps you apply pediatric nursing concepts to real world practice. It assesses, reinforces and strengthens your understanding of pediatric nursing with learning activities, review questions and case studies with critical thinking questions. Learning Key Terms consisting of matching and fill in the blank questions test your ability to define all key terms highlighted in each textbook chapter. An answer key for the review questions and learning activities is included in the back of the study guide. Pages are perforated so submitting assignments is easy. Reviewing Key Concepts and Content includes questions in various formats to provide you ample opportunity to assess your knowledge and comprehension of information covered in the text. Activities include matching, fill in the blank, true/false, short answer and multiple choice to help you identify the core content of the chapter and test your understanding upon completion of reading the chapter. Thinking Critically case based activities require you to apply the concepts found in the chapters to solve problems, make decisions concerning care management and provide responses to patient questions and concerns. Learning Key Terms consists of matching and fill in the blank questions that let you test your ability to define all key terms highlighted in the corresponding textbook chapter. An answer key is included at the end of the Study Guide. Perforated pages allow you to submit assignments to your instructor. NEW Updated chapter organization and

content matches revised and reorganized text **Augmented Intelligence: Deep Learning, Machine Learning, Cognitive Computing, Educational Data Mining** Om Prakash Jena, 2022-07-29 Augmented intelligence is an alternate approach of artificial intelligence AI which emphasizes AI's assistive role Augmented intelligence enhances human skills of reasoning in a robotic system or software by simulating expectancy educational mining problem solving recollection sequencing and decision making capabilities It is based on a combination of techniques such as machine learning deep learning and cognitive computing This book explains artificial intelligence models that support assistive processes in different situations The contributors aim to provide information to a diverse audience with groundbreaking developments in mathematical computing The book presents 8 chapters on these topics Educational data mining in augmented reality virtual learning environment Brain and computer interfaces Tree based tools for chemometric analysis of infrared spectra Applications of deep learning in medical engineering Bankruptcy prediction model using an enhanced boosting classifier Reputation systems for mobile agent security The crow search algorithm COVID 19 diagnosis and treatment The contents attempt to integrate various facets of augmented Intelligence by describing recent research developments and advanced topics of interest to academicians and researchers working on machine learning problems and AI **Textbook of Applied Physiology for Nurses - E-Book** Mario Vaz, Nachiket Shankar, 2024-09-01 Textbook of Applied Physiology for Nurses E Book Mind-body medicine and its impacts on psychological networks, quality of life, and health Steffen Schulz, Georg Seifert, Dirk Cysarz, 2023-04-27
