CIRCULATORY SYSTEM

Explain what the different parts of blood do. Make sure to include these terms: plasma, white blood cells, platelets & red blood cells.

Circulatory System Matching

Read the article found here: <https://www.bbc.com/health/digesters/2019/01/190101-circulatory-system> then write the correct vocabulary word in the space after the definition.

1. The two chambers on top of the heart are called _____.
2. Blood moves through many tubes called arteries and veins, which together are called _____.
3. Movement of the blood through the heart and around the body is called _____.

The Circulatory System

The circulatory system, also referred to as the cardiovascular system, is made up of the blood, blood vessels, and the heart. Its main function is to deliver nutrients and oxygen to the body's cells and to remove waste products.

There are two different types of blood vessels. Arteries carry blood away from the heart, and veins carry blood back to the heart.

The circulatory system also carries oxygen, nutrients, and hormones to cells, and removes waste products, like carbon dioxide, from the body.

Parts of the Heart

The heart has four chambers - two on the left and two on the right. The four chambers are the right atrium, right ventricle, left atrium, and left ventricle. These pump blood out of the heart. The interventricular septum is between the two ventricles. The two top chambers are the right atrium and the left atrium. The two bottom chambers are the right ventricle and the left ventricle. The septum is between the atria.

Pathways from the Heart

Two pathways from the heart are the pulmonary circulation and the systemic circulation.

Pulmonary circulation refers to the lungs and back again. The pulmonary circulation is the pathway that carries blood from the heart to the lungs and back again.

THE CIRCULATORY SYSTEM

About the Heart

Between 7 and 8 quarts of blood pass through the heart each day. In a grown adult, the heart pumps about 2,000 gallons of blood a day. The heart is about the size of your fist. It is smaller than a strand of human hair. It is made of muscle. One that pumps blood through the body through arteries.
