The Higher Learning in America Thorstein Veblen, 1918 Perhaps the pivotal book in the reform of higher education in the United States Robert M Hutchins classic is once again available with a brilliant personal and professional appreciation by Harry S Ashmore When it was published in 1936 The Higher Learning in America brought into focus the root causes of the controversies that still beset the nation's educational system Taking office in 1929 as president of the University of Chicago Hutchins began his tenure by declaring the learning available in even the most prestigious universities grossly deficient He cited himself as case in point At Yale he had graduated at the top of his college class and set a record in the law school that led to appointment as professor and at 26 promotion to dean But he had acquired only some knowledge of the Bible of Shakespeare and Faust of one dialogue of Plato and of the opinions of many semi-literate and a few literate judges and that was about all The curricular reforms and administrative reorganization he undertook at Chicago are set forth in this volume along with the philosophical arguments he worked out to explicate and defend his views His goal was to reestablish the liberal arts and humanities as the basis for undergraduate education consigning specialization and research to graduate and professional schools Hutchins envisioned the university as a community of scholars who in addition to teaching and research provided independent thought and criticism of a society being rapidly transformed by science and technology Challenging the educational establishment at every pertinent level he became the most celebrated and most controversial intellectual of his era After twenty-two years at Chicago Hutchins
