Long-Term Institutional Management of U.S. Department of Energy Legacy Waste Sites National Research Council, Commission on Geosciences, Environment, and Resources, Board on Radioactive Waste Management, Committee on the Remediation of Buried and Tank Wastes, 2000-11-09 It is now becoming clear that relatively few U S Department of Energy DOE waste sites will be cleaned up to the point where they can be released for unrestricted use Long term stewardship activities to protect human health and the environment from hazards that may remain at its sites after cessation of remediation will be required for over 100 of the 144 waste sites under DOE control U S Department of Energy 1999 After stabilizing wastes that remain on site and containing them as well as is feasible DOE intends to rely on stewardship for as long as hazards persist in many cases indefinitely Physical containment barriers the management systems upon which their long term reliability depends and institutional controls intended to prevent exposure of people and the environment to the remaining site hazards will have to be maintained at some DOE sites for an indefinite period of time The Committee on Remediation of Buried and Tank Wastes finds that much regarding DOE s intended reliance on long term

stewardship is at this point problematic The details of long term stewardship planning are yet to be specified the adequacy of funding is not assured and there is no convincing evidence that institutional controls and other stewardship measures are reliable over the long term Scientific understanding of the factors that govern the long term behavior of residual contaminants in the environment is not adequate Yet the likelihood that institutional management measures will fail at some point is relatively high underscoring the need to assure that decisions made in the near term are based on the best available science Improving institutional capabilities can be expected to be every bit as difficult as improving scientific and technical ones but without improved understanding of why and how institutions succeed and fail the follow through necessary to assure that long term stewardship remains effective cannot reliably be counted on to occur Long Term Institutional Management of U S Department of Energy Legacy Waste Sites examines the capabilities and limitations of the scientific technical and human and institutional systems that compose the measures that DOE expects to put into place at potentially hazardous residually contaminated sites **Autocar** ,2000 Legacies of the International Criminal Tribunal for the Former Yugoslavia Carsten Stahn,Carmel Agius,Serge Brammertz,Colleen Rohan,2020-06-10 The International Criminal Tribunal for the former Yugoslavia ICTY is one the pioneering experiments in international criminal justice It has left a rich legal institutional and non judicial legacy This edited collection provides a broad perspective on the contribution of the tribunal to law memory and justice It explores some of the accomplishments challenges and critiques of the ICTY including its less visible legacies The book analyses different sites of legacy the expressive function of the tribunal its contribution to the framing of facts events and narratives of the conflict in the former Yugoslavia and investigative and experiential legacies It also explores lesser known aspects of legal practice such as defence investigative ethics judgment drafting contempt cases against journalists interpretation and translation outreach approaches to punishment and sentencing the tribunals impact on domestic legal systems and ongoing debates over impact and societal reception The volume combines voices from inside the tribunal with external perspectives to elaborate the rich history of the ICTY which continues to be written to this day

**Overcoming the Past, Focusing on the Future** United States Commission on Civil Rights,2000 **Aircraft Surveillance Systems** Busyairah Syd Ali,2017-11-06 The Communication Navigation and Surveillance CNS systems provide air traffic controllers with the information necessary to ensure the specified separation between aircraft and efficient management of airspace as well as assistance to flight crew for safe navigation However the radar systems that support air traffic management ATM and in particular air traffic control ATC are at their operational limit This is particularly acute in the provision of the ATC services in low altitude remote and oceanic areas Limitations in the current surveillance systems include unavailability of services in oceanic and remote areas limited services during extreme weather conditions and outdated equipment with limited availability of spare parts to support system operation These limitations have resulted in fatal accidents This book addresses the limitations of radar to support ATC in various operational environments identified and

verified by analysing five years of safety data from Avinor the Air Navigation Service Provider ANSP in Norway It derives a set of taxonomy and from this develops a causal model for incident accident due to limitations in the surveillance system The taxonomy provides a new method for ANSPs to categorize incidents while the causal model is useful for incident accident investigations The book also provides theoretical justifications for the use of Automatic Dependent Surveillance Broadcast ADS B to overcome the limitations of radar systems and identify areas of improvements to enable seamless ATC services Written in a style that makes it accessible to non specialists Aircraft Surveillance Systems will be of interest to many in the field of aviation particularly ATM safety and accident incident investigation It will also offer a useful reference on this vital topic for air traffic management courses     [SEC Docket](#) United States. Hallam,2013-01-10 Individual Case Formulation presents formulation as a process that can be taught systematically to trainee therapists The book begins by discussing assorted theories of case formulation and critiques their ability to be applied in real world situations The individual case formulation

approach is then defined and discussed as a way to integrate the best of what different theoretical orientations have to offer in conjunction with the expertise and clinical judgment of the therapist. The book proposes a systemic functional framework that focuses on difficulties as defined by the client and emphasizes constructive solutions to problems rather than symptom reduction. Moving from theory to application, the book then guides therapists in how to conduct assessment interviews, how to reach a provisional formulation, how to test that formulation for accuracy and reformulate if necessary, how a therapist can make explicit what their clinical reasoning was in making the case formulation, and provides case examples and transcripts so readers will better grasp the concepts in action. Intended both for the starting or trainee therapist and the experienced clinician, *Individual Case Formulation* provides a practical guide for those looking to improve their case formulation skills. Reviews critiques and compares multiple theories on formulation. Identifies benefits of utilizing the individual case approach. Guides trainee therapists how to conduct assessment interviews and reach a provisional formulation. Presents a conceptual framework for developing and testing a formulation. Helps trainees make explicit their clinical reasoning. Field tested for several decades. Provides case examples with annotated transcripts to illustrate the process of formulation.
