Implementation Best Practices for IBM DB2 BLU Acceleration with SAP BW on IBM Power Systems Dino Quintero,Yukiko Itaya,Speitim Velic,Adriana Melges Quintanilha Weingart,IBM Redbooks,2015-05-11 BLU Acceleration is a new technology that has been developed by IBM and integrated directly into the IBM DB2 engine BLU Acceleration is a new storage engine along with integrated run time directly into the core DB2 engine to support the storage and analysis of column organized tables The BLU Acceleration processing is parallel to the regular row based table processing found in the DB2 engine This is not a bolt on technology nor is it a separate analytic engine that sits outside of DB2 Much like when IBM added XML data as a first class object within the database along with all the storage and processing enhancements that came

with XML now IBM has added column organized tables directly into the storage and processing engine of DB2 This IBM Redbooks publication shows examples on an IBM Power SystemsTM entry server as a starter configuration for small organizations and build larger configurations with IBM Power Systems larger servers This publication takes you through how to build a BLU Acceleration solution on IBM POWER having SAP Landscape integrated to it This publication implements SAP NetWeaver Business Warehouse Systems as part of the scenario using another DB2 Feature called Near Line Storage NLS on IBM POWER virtualization features to develop and document best recommendation scenarios This publication is targeted towards technical professionals DBAs data architects consultants technical support staff and IT specialists responsible for delivering cost effective data management solutions to provide the best system configuration for their clients data analytics on Power Systems **Logistic Core Operations with SAP** Jens Kappauf,Bernd Lauterbach,Matthias Koch,2012-02-29 Logistic Core Operations with SAP not only provides an overview of core logistics processes and functionality it also shows how SAP s Business Suite covers logistic core operations what features are supported and which systems can be used to implement end to end processes in the following logistic core disciplines Procurement Distribution Transportation Warehouse Logistics and Inventory Management and Compliance and Reporting In this context the authors not only explain their integration the organizational set up and master data but also which solution fits best for a particular business need This book serves as a solid foundation for understanding SAP software No matter whether you are a student or a manager involved in an SAP implementation the authors go far beyond traditional function and feature descriptions helping you ask the right questions providing answers and making recommendations The book assists you in understanding SAP terminology concepts and technological components as well as their closed loop integration Written in a clear straight forward style and using practical examples it contains valuable tips illustrative screenshots and flowcharts as well as best practices showing how business requirements are mapped into software functionality *Auswahl einer Softwarelösung zur Erstellung einer automatisierten technischen Dokumentation für das SAP Business Information Warehouse in der FinanzIT GmbH* Christian Struck,2012-01-26 Bachelorarbeit aus dem Jahr 2007 im Fachbereich Informatik Wirtschaftsinformatik Note 1 3 Hochschule Weserbergland Sprache Deutsch Abstract In order to draw conclusions from bugs in production or further development a complete high quality documentation is necessary The manual creation of technical documentation in SAP Business Information Warehouse BW needs a lot of time in the wheel of deployment and the result does not meet the main requirements at FinanzIT This is the reason why the staff of the SAP BW group is interested in a new solution which can automatically create a technical documentation for the SAP BW environment The following paper aims to describe the procedure of selecting the best software solution to achieve the objectives und solve the current problems To make the reader familiar with the problem we are faced with the first part explains the background of general documentation and the SAP module BW an information system for management The presentation of theoretical process models describes the

different phases of evaluating software These findings are then applied to the actual implementation After analysing possible solutions only four alternatives come into consideration In addition to two external software providers the options are to either make a proprietary development or to do nothing maintain the current method and accept the situation With the aid of the Analytic Hierarchy Process AHP it is possible to select the best option and to calculate the individual benefits Its application demonstrates that the proprietary development alternative is the most beneficial In the next step the individual costs have to be considered Although the preferred alternative to create an own solution is in the face of investitions not the cheapest option it would have the best cost benefit ratio This finding results in a recommendation to continue with the implementation of the own solution **InfoWorld** ,2001-05-07 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *First Steps in SAP Business Warehouse (BW)* Gerardo di Giuseppe, Companies are leveraging the power of big data and are tasked with putting an infrastructure in place that will allow for the analysis of this data One essential piece of that infrastructure is the data warehouse DWH This book offers a comprehensive introduction to SAP Business Warehouse BW You ll learn about the primary features and functions of SAP NetWeaver BW including architecture data modeling data extraction data staging and reporting Learn about the different types of InfoProviders available in SAP BW and get a detailed understanding of InfoObjects and InfoCubes Walk through the ETL process and best practices for administering InfoCubes and DataStore objects Get tips on how to optimize data access using aggregates and statistics By using practical examples tips and screenshots the author brings readers new to SAP BW up to speed on the fundamentals and best practices for providing reports to users Tips for loading data from a source system to SAP BW with SAP ETL How to automate ETL tasks using process chains Using SAP BW Business Content to accelerate the design of your BW objects Leverage BEx Query Designer and BEx Analyzer Network World ,2001-05-07 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce Integrated Business Processes in SAP S/4HANA Ernst Schulten,2024-05-22 This book provides a compact overview of how you can use SAP S 4HANA to map and efficiently control business processes in a company It gives you an insight into digitalization in these areas The presentation follows the content of the course that prepares students from universities and colleges of applied sciences as well as prospective SAP consultants for the internationally recognized SAP industry certification exam TS410 Take a deep dive into the processes in internal and external finance human resources purchasing production and sales maintenance and project management You will gain an insight into the value creation processes of the financial supply chain You will also find out what advantages and opportunities new developments in the area of SAP
