Governance in Transition Ján Buček,Andrew Ryder,2015-04-15 This book looks at experience in government restructuring and devolution from a variety of national and international perspectives both within the European Union and elsewhere focusing on lessons learned and ways forward Since the 1980s there has been a global trend to give more power to local governments Even in Korea and the United Kingdom the most centralised countries in the OECD local government powers have increased with substantial economic benefits Within the European Union the principle of subsidiarity has enshrined the idea of devolution New member states particularly in central and eastern Europe have significantly created new and self sufficient local and regional governments However this process has been complicated Devolution is not a panacea in its own right and need not lead to economic growth While it can encourage savings through collaboration it can also lead to confused lines of authority and can complicate policy formation and implantation Devolution can strain local budgets forcing local governments to rely on their own sources of finance rather than central government transfers Suburbanisation rural depopulation the growth of some regions and the decline of others have raised new problems particularly related to inter governmental cooperation among local governments and different levels of government In many cases an increased number of governments has increased administrative costs [Disha Guide for IB ACIO Grade-II/ Executive \(Tier-I\) Exam with Previous Year Questions 4th Edition | Intelligence Bureau Assistant Central Intelligence Officer](#) Disha Experts,2025-09-03 The updated and revised 4th edition of the book Guide to IB ACIO Intelligence Bureau Assistant Central Intelligence Officer Grade II Executive Tier I Exam book covers 4 Comprehensive sections on Quantitative Aptitude Numerical Analytical Logical Ability Reasoning English language and General awareness General studies 7 past papers 2012 2013 2015 2017 2021 2 sets of 2024 Detailed theory along with solved examples and short cuts tricks to solve problems The General Awareness General Studies section thoroughly updated covers questions on Current Affairs History Geography Politics Economic and General Science etc The Numerical Analytical Logical Ability Reasoning section includes Verbal and Non Verbal Reasoning In all 3100 questions with solutions to the exercise have been provided in the form of Exercise at the end of each Chapter 100% Errorless solutions provided **French Cinema and the Great War** Marcelline Block,Barry Nevin,2016-02-04 Even a century after its conclusion the devastation of the Great War still echoes in the work of artists who

try to make sense of the political moral ideological and economic changes and challenges it spawned France the military major power of the Western Front carries the legacy of battles on its own soil and countless French lives lost defending the nation from the Central Powers It is no surprise that the impact of the First World War can still be seen in French films into the present day French Cinema and the Great War Remembrance and Representation provides the first book length study of World War I as it is featured in French cinema from the silent era to contemporary films Presented in three thematic sections Recording and Remembering the Great War Women at the Front and Interrogating Commemoration the essays in this volume explore the ways in which French film contributes to the restoration and modification of memories of the war Films such as *La Grande Illusion* *King of Hearts* *A Very Long Engagement* and *Joyeux Noel* are among those discussed in the volume s examination of the various ways in which film mediates personal and collective memories of this critical historical event This volume will be an invaluable resource not only to those interested in French Cinema or the cinema of the Great War but also to those interested in the impacts of war more generally on the cultural output of nations torn by the violence death and destruction of military conflict

External Powers and the Gulf Monarchies Jonathan Fulton,Li-Chen Sim,2018-09-03 The Gulf monarchies have been generally perceived as status quo actors reliant on the USA for their security but in response to regional events particularly the Arab Spring of 2011 they are pursuing more activist foreign policies which has allowed other international powers to play a larger role in regional affairs This book analyses the changing dynamic in this region with expert contributors providing original empirical case studies that examine the relations between the Gulf monarchies and extra regional powers including the USA Russia China India Brazil Turkey Japan South Korea France and the United Kingdom At the theoretical level these case studies explore the extent to which different international relations and international political economy theories explain change in these relationships as the regional political and security environment shifts Focusing on how and why external powers approach their relationships with the Gulf monarchies contributors ask what motivates external powers to pursue deeper involvement in an unstable region that has seen three major conflicts in the past 40 years Addressing an under analysed yet important topic the volume will appeal to scholars in the fields of international relations and international political economy as well as area specialists on the Gulf and those working on the foreign policy issues of the extra regional powers studied

The Algorithmic Society Marc Schuilenburg,Rik Peeters,2020-12-29 We live in an algorithmic society Algorithms have become the main mediator through which power is enacted in our society This book brings together three academic fields Public Administration Criminal Justice and Urban Governance into a single conceptual framework and offers a broad cultural political analysis addressing critical and ethical issues of algorithms Governments are increasingly turning towards algorithms to predict criminality deliver public services

allocate resources and calculate recidivism rates Mind boggling amounts of data regarding our daily actions are analysed to make decisions that manage control and nudge our behaviour in everyday life The contributions in this book offer a broad analysis of the mechanisms and social implications of algorithmic governance Reporting from the cutting edge of scientific research the result is illuminating and useful for understanding the relations between algorithms and power Topics covered include Algorithmic governmentality Transparency and accountability Fairness in criminal justice and predictive policing Principles of good digital administration Artificial Intelligence AI in the smart city This book is essential reading for students and scholars of Sociology Criminology Public Administration Political Sciences and Cultural Theory interested in the integration of algorithms into the governance of society **The Politics of Crisis in Europe** Mai'a K. Davis

Cross,2017-03-02 The Politics of Crisis in Europe explores the resilience of the European Union in the face of repeated crises perceived to threaten its very existence While it is often observed after the fact that these crises serve as opportunities for integration this is the first critical analysis to suggest that we cannot fully understand the nature and severity of these crises without recognising the role of societal reaction to events and the nature of social narratives about crisis especially those advanced by the media Through a close examination of the 2003 Iraq crisis the 2005 constitutional crisis and the 2010 12 Eurozone crisis this book identifies a pattern across these episodes demonstrating how narratives about crises provide the means to openly air underlying societal tensions that would otherwise remain under the surface impeding further integration

Black France, White Europe Emily Marker,2022-10-15 Winner of the George Louis Beer Prize Black France White Europe illuminates the deeply entangled history of European integration and African decolonization Emily Marker maps the horizons of belonging in postwar France as leaders contemplated the inclusion of France's old African empire in the new Europe in the making European integration intensified longstanding structural contradictions of French colonial rule in Africa Would Black Africans and Black African Muslims be French If so would they then also be European What would that mean for republican France and united Europe more broadly Marker examines these questions through the lens of youth amid a surprising array of youth and education initiatives to stimulate imperial renewal and European integration from the ground up She explores how education reforms and programs promoting solidarity between French and African youth collided with transnational efforts to make young people in Western Europe feel more European She connects a particular postwar vision for European unity which coded Europe as both white and raceless Christian and secular to crucial decisions about what should be taught in African classrooms and how many scholarships to provide young Africans to study and train in France That vision of Europe also informed French responses to African student activism for racial and religious equality which ultimately turned many young francophone Africans away from France irrevocably Black France White Europe shows that the interconnected history of colonial and European youth initiatives is key to explaining why despite efforts to strengthen ties with its African colonies in the 1940s and 1950s France became more European during those years
