**Managing School Districts for High Performance** Stacey Childress, 2007 Managing School Districts for High Performance brings together more than twenty case studies and other readings that offer a powerful and transformative approach to advancing and sustaining the work of school improvement At the center of this work is the concept of organizational coherence aligning organizational design human capital management resource allocation and accountability and performance improvement systems to support an overarching strategy This central idea provides a valuable conceptual framework for current and future school leaders The case studies presented in Managing School Districts for High Performance grow out of the Public Education Leadership Project PELP a unique partnership between the Harvard Business School the Harvard Graduate School of Education and a network of urban school districts This rich array of cases explores the managerial challenges districts face as they seek to ensure rich learning opportunities and high achievement for all students across a system of schools This book of insightful case studies fills a void long felt by educational administrators in search of practical real world training tools It will serve as a catalyst for the tough conversations district leaders need to have about achieving high quality outcomes for all students The Broad Center for the Management of School Systems has used many of these cases with great success and we are excited that they are now compiled into a single collection Dan Katzir Managing Director The Broad Foundation This volume is not a treatise about how schools and districts should work Rather it provides a deep immersion in the real dilemmas involved in advancing school district reform Anyone who works through these cases cannot help but come away with a more informed vision for change a more reflective orientation about the interrelationships among the multiple tasks involved and a more prudent grasp of what it takes to educate all children to high academic standards The course of study presented by Managing School Districts for High Performance should be required professional education for anyone charged with advancing a coherent agenda of school improvement in our diverse demanding and rapidly changing society Anthony S Bryk Spencer Professor of Organizational Studies Stanford University This set of case studies offers practitioners policymakers and scholars the opportunity to learn from the collective wisdom and real life experiences of educational leaders involved in systemic transformation Implementing coherent reform strategies designed to improve and sustain student performance often takes place in a vacuum As a former urban superintendent I believe that these selected educational case studies provide a compelling forum for shared experiential teaching and learning Arlene Ackerman Christian A Johnson Professor of Outstanding Educational Practice Teachers College Columbia University This collaboration between the Harvard Business School and the Harvard Graduate School of Education provides a set of analytical tools to address the most complex and challenging issues facing urban public schools The contemporary case studies document actual choices and constraints and point to patterns and similarities across organizations from urban schools to corporate environments Carol Johnson Superintendent Boston Public Schools Stacy Childress is a lecturer at

Farnsworth,2011-01-18 This book walks community activists through the rationale for assuming local responsibility for academic performance outlines steps needed to drive that change and suggests curricular direction and school policy requirements **Resources in Education** ,1998 **Leading for Equity** Stacey M. Childress,Denis P. Doyle,David A. Thomas,2009-07-01 Leading for Equity tells the compelling story of the Montgomery County Maryland Public Schools and its transformation in less than a decade into a system committed to breaking the links between race and class and academic achievement In chapters organized around six core themes the authors lay out the essential elements of MCPS s success They identify key lessons other districts can draw from MCPS s experience and offer a framework for applying them A dramatic departure from business as usual MCPS has won nationwide attention as a compelling model for tackling the achievement and opportunity issues that confront our nation as a whole

the Montgomery County Maryland Public School System MCPS Achieve conducted an evaluation of the MCPS K 12  
Curriculum Frameworks and high school semester exams in English and mathematics The review was designed to determine  
how well the MCPS Frameworks and exams align with Maryland state academic standards and more broadly how they  
compare with standards from other states and nations Findings include 1 Overall Montgomery County s Curriculum  
Frameworks in English and math are quite comprehensive 2 For the most part the expectations in the Frameworks are

clearly articulated jargon free and their format and numbering schema make them easy to use 3 MCPS Frameworks in English language arts and math are very consistent with state Content Standards 4 MCPS Frameworks are rigorous and reasonable and if strengthened in several key areas can be on par with the best in the nation and the world 5 Montgomery County's semester tests are high quality and align to both district Frameworks and state standards and 6 MCPS tests generally are rigorous and assess important high school content although if the goal is to have most students prepared for college level work by 12th grade the district should raise the level of rigor of its English 9 honors level first semester test and its Algebra I and Geometry tests Expert and staff biographies are appended Contains 1 table This report was prepared by Achieve Inc for Montgomery County Public Schools

**Algebra for the Urban Student** Canaa Lee, 2012-05-15 Algebra for the Urban Student offers an algebra textbook for the typical math student In many cases such textbooks are written for people who love mathematics and understand the jargon Teacher Canaa Lee has incorporated her personal experiences as a high school mathematics teacher into a textbook that is specially geared toward students needs Most students dislike mathematics because the subject has always been difficult for them to master With this in mind Algebra for the Urban Student builds on methods Lee has used successfully in her classroom to motivate her students to a better more practical understanding of math When students need to learn math concepts they can turn to a clearly written easy to use guide to help them complete their assignments Each chapter in Algebra for the Urban Student illustrates a significant algebra concept such as solving linear equations and inequalities or finding the slope of a line The chapters also include homework assignments that provide students with the opportunity to demonstrate their understanding of the concept explained in that chapter In addition there are real world projects for both algebra and geometry and guides for whole and small class discussions Algebra for the Urban Student insures that every student has the information they need to succeed at mathematics

*Algebra: Form and Function, 2e Student Solutions Manual* Guadalupe I. Lozano, Deborah Hughes-Hallett, Eric Connally, 2014-10-13 This is the Student Solutions Manual to accompany Algebra Form and Function 2nd Edition Algebra Form and Function 2nd Edition offers a fresh approach to algebra that focuses on teaching readers how to truly understand the principles rather than viewing them merely as tools for other forms of mathematics Meant for a College Algebra course Algebra Form and Function 2nd Edition is an introduction to

one of the fundamental aspects of modern society Algebraic equations describe the laws of science the principles of engineering and the rules of business The power of algebra lies in the efficient symbolic representation of complex ideas which also presents the main difficulty in learning it It is easy to forget the underlying structure of algebra and rely instead on a surface knowledge of algebraic manipulations Most students rely on surface knowledge of algebraic manipulations without understanding the underlying structure of algebra that allows them to see patterns and apply it to multiple situations McCallum focuses on the structure from the start *Better Algebra for All* Sally Black,2014 **Competition Algebra** Xing Zhou,2017-01-14 Algebra is taught from elementary school to college and beyond Algebraic problems present a significant portion in all math competitions including MathCounts AMC AIME USAMO and so on Therefore solving competition level algebraic problems is a must master skills for every contest contender Algebra includes a wide range of topics and techniques Some of them may be related to advanced mathematical theorems and tools Therefore it is impossible to cover all of them in one book However middle school and high school level competitions usually do not require advanced mathematics Instead the emphasis is on the applications of basic algebraic skills in a flexible and effective way to solve complex problems As a result it is a wise strategy to thoroughly understand the most important topics and drill down into details of related solving techniques in order to improve one's skill and test performance This book covers three basic but important topics equation sequence and function While these topics are all taught in schools there are some competition specific techniques which deserve a systematic discussion Taking Vieta's theorem as an example While polynomial transformation is a well known method to evaluate expressions such as  $x_1^2 + x_2^2$  there are several other powerful techniques They can be used to evaluate some complex expressions in a more efficient and less error prone way These expressions can have high power such as  $x_1^7 + x_2^7$  or are asymmetric such as  $5x_1^3 + 3x_2^5$  In fact the latter asymmetric expression can present a challenge to many students who only know the polynomial transformation method In addition to expression evaluation Vieta's theorem can also be used to solve some seemingly unrelated problems Such problems are among top hits in various math competitions Sequence is another good example Most students understand the two basic types of sequences namely arithmetic and geometric Though the vast majority of sequence related problems in math contests can be converted to these basic types finding such conversion may be a demanding task which is usually not discussed in classrooms Meanwhile in order to become a strong competitor one must also understand a few additional more complex sequences especially those defined recursively They are beyond the scope of school textbooks but are discussed in this book The goal of this book is to give an organized in depth discussion on competition level techniques Fully understanding these techniques will help students to quickly recognize and solve these types of problems It will also lay down a solid foundation for them to solve other problems whose solutions require these algebraic techniques as critical stepping stones Please visit <http://www.ma> **Practice Makes Perfect Algebra** Carolyn Wheater,2010-07-16 A no nonsense
