Medical and Veterinary Entomology Gary R. Mullen, Lance A. Durden, 2018-10-02 The first and second editions of Medical and Veterinary Entomology edited by Gary R Mullen and Lance A Durden published in 2002 and 2009 respectively have been highly praised and become widely used as a textbook for classroom instruction This fully revised third edition continues the focus on the diversity of arthropods affecting human and animal health with separate chapters devoted to each of the taxonomic groups of insects and arachnids of medical or veterinary concern including spiders scorpions mites and ticks Each chapter includes sections on taxonomy morphology life history and behavior and ecology with separate sections on those species of public health and veterinary importance Each concludes with approaches to management of pest species and prevention of arthropod borne diseases The third edition provides a comprehensive source for teaching medical and or veterinary entomology at the college and university level targeted particularly at upper level undergraduate and graduate postgraduate programs In addition to its value as a student textbook the volume has appeal to a much broader audience specialists and non specialists alike It provides a key reference for biologists in general entomologists zoologists parasitologists physicians public health personnel veterinarians wildlife biologists vector biologists military entomologists the general public and others seeking a readable authoritative account on this important topic Completely revised and updated edition Includes a distinguished group of 40 nationally and internationally recognized contributors Sixteen new authors in addition to 25 continuing contributors from the first and second editions A new chapter on Arthropod Toxins and Venoms Illustrated with 560 mostly color figures and updated maps depicting the distribution of important arthropod taxa and arthropod borne

diseases A significantly expanded and well illustrated chapter on Molecular Tools Used in Medical and Veterinary Entomology Coverage of emerging and newly recognized arthropod concerns including mosquito borne Zika and Chikungunya viruses tick borne Bourbon and Heartland viruses tick borne rickettsioses and anaplasmosis and red meat allergy associated with tick bites A 1700 word Glossary An Appendix of Arthropod Related Viruses of Medical and Veterinary Importance *The Review of Applied Entomology*, 1921 *MCQs in Travel Medicine* Dom Colbert, 2012-12-20 MCQs in Travel Medicine contains over 600 multiple choice questions with detailed explanations which both teach and challenge the reader In an easy to read format this book is ideal for practitioners in busy day to day practices and those preparing for examinations in travel medicine *Biology of Blood-Sucking Insects* Mike Lehan, 2012-12-06 Blood sucking insects are the vectors of many of the most debilitating parasites of man and his domesticated animals In addition they are of considerable direct cost to the agricultural industry through losses in milk and meat yields and through damage to hides and wool etc So not surprisingly many books of medical and veterinary entomology have been written Most of these texts are organized taxonomically giving the details of the life cycles bionomics relationship to disease and economic importance of each of the insect groups in turn I have taken a different approach This book is topic led and aims to discuss the biological themes which are common in the lives of blood sucking insects To do this I have concentrated on those aspects of the biology of these fascinating insects which have been clearly modified in some way to suit the blood sucking habit For example I have discussed feeding and digestion in some detail because feeding on blood presents insects with special problems but I have not discussed respiration because it is not affected in any particular way by haematophagy Naturally there is a subjective element in the choice of topics for discussion and the weight given to each I hope that I have not let my enthusiasm for particular subjects get the better of me on too many occasions and that the subject material achieves an overall balance
