Shahria Alam,Kelvin Tsun Wai Ng,Jianbing Li,Ashraf El Damatty,Clark Lim,2023-08-05 This book comprises the proceedings of the Annual Conference of the Canadian Society of Civil Engineering 2022 The contents of this volume focus on specialty conferences in construction environmental hydrotechnical materials structures transportation engineering etc This volume will prove a valuable resource for those in academia and industry **Recent Developments in Structural Engineering, Volume 1** Manmohan Dass

Goel,Ratnesh Kumar,Sangeeta S. Gadve,2024-05-02 The book presents the select proceedings of 13th Structural Engineering Convention It covers the latest research in multidisciplinary areas within structural engineering Various topics covered include structural dynamics structural mechanics finite element methods structural vibration control advanced cementitious and composite materials bridge engineering soil structure interaction blast impact fire material and many more The book will be a useful reference material for structural engineering researchers and practicing engineers **International Handbook**

of Threat Assessment J. Reid Meloy,Jens Hoffmann,2021 This introductory chapter sets forth three foundations for threat assessment and management the first foundation is the defining of basic concepts such as threat assessment and threat management the second foundation outlines the similarities and differences between threat assessment and violence risk assessment the third foundation is a detailed overview of the research findings theoretical avenues measurement instruments and developments in practice over the past quarter century The goal of our chapter is to introduce the professional reader to the young scientific field of threat assessment and management and to clarify and guide the seasoned professional toward greater excellence in his or her work *Advances in Agronomy* ,2024-04-23 *Advances in Agronomy* Volume 186 the latest

release in this leading reference on agronomy contains a variety of updates and highlights new advances in the field each written by an international board of authors Includes numerous timely state of the art reviews on the latest advancements in agronomy Features distinguished well recognized authors from around the world Builds upon this venerable and iconic review series Covers the extensive variety and breadth of subject matter in the crop and soil sciences **Improving the quality of outcome measurement for adults with disabilities receiving community-based services** Renata

Ticha, Brian Aberly, Jan Šiška, 2023-04-26 Proceeding of the 3rd International Conference on Electronics, Biomedical Engineering, and Health Informatics Triwiyanto Triwiyanto, Achmad Rizal, Wahyu Caesarendra, 2023-04-28 This book presents high quality peer reviewed papers from the International Conference on Electronics Biomedical Engineering and Health Informatics ICEBEHI 2022 held at Surabaya Indonesia virtually The contents are broadly divided into three parts a Electronics b Biomedical Engineering and c Health Informatics The major focus is on emerging technologies and their applications in the domain of biomedical engineering It includes papers based on original theoretical practical and experimental simulations development applications measurements and testing Featuring the latest advances in the field of biomedical engineering applications this book serves as a definitive reference resource for researchers professors and practitioners interested in exploring advanced techniques in the fields of electronics biomedical engineering and health informatics The applications and solutions discussed here provide excellent reference material for future product development *Unraveling inflammaging : A pathway to Prevent Age-related Disease in Animals* Toshiro Arai, Takahiro Teshima, Osamu Yamato, Jose Ceron, 2025-01-13 The field of age related diseases in animals particularly focusing on the concept of inflammaging forms the basis of this research topic Inflammaging a term coined to describe the chronic proinflammatory state often associated with aging has been linked to a variety of degenerative diseases This low grade chronic inflammatory state is believed to result from an accumulation of damaged macromolecules and cellular debris due to increased production and inhibited damage surveillance and repair functions in multiple tissues The secretion of proinflammatory cytokines from senescent cells known as the senescence associated secretory phenotype SASP is thought to contribute to the onset of inflammaging In animals such as dogs and cats the longer they live the more diseases they develop similar to humans with inflammaging being a potential cause of various age related diseases The primary aim of this research topic is to delve deeper into the mechanisms of inflammaging in animals and its role in age related diseases The goal is to develop new diagnostic biomarkers for inflammaging which could potentially lead to early diagnosis and prevention of age related diseases In an aging society the increase in age related diseases is inevitable However the extension of healthy life years and the ability to stay healthy until old age are standard medical requirements Therefore the early diagnosis of inflammaging could be a significant step towards preventing various age related diseases in animals **Oceanography and Benthic Ecology of Patagonian Fjords - 500 years From the Discovery of the Strait Magellan** Giorgio Bavestrello, 2022-09-02 *Chaitow's Muscle Energy Techniques E-Book* Sasha Chaitow, Sandy Fritz, 2023-04-11 The fifth edition of this well loved manual for understanding and using Muscle Energy Techniques METs presents clear guidelines for their applications resting on the newest scientific research and embedded in the framework of whole person health care It provides a comprehensive evidence based how to guide for applying MET in the treatment of some forms of musculoskeletal dysfunction to alleviate pain and support functional movement Packed with colour illustrations and complemented by more

than 50 instructional videos featuring Leon Chaitow demonstrating the techniques described Muscle Energy Techniques 5e guides the reader through both theory and practice with an emphasis on evidence informed clinical reasoning and application This fifth edition reconvenes the international team of expert contributors originally selected by Leon Chaitow to present the role of METs in a range of clinical settings and scenarios These include the use of METs for treating a wide range of acute and chronic pain conditions prevention and management of trauma and injuries in athletes and their successful incorporation into physiotherapy chiropractic osteopathic massage therapy and rehabilitation environments New chapters and sections embed the use of METs in the biopsychosocial framework for whole person healthcare based on the latest guidelines Includes case studies and guidance for clinical practice Entirely new research review chapter presents the latest research findings underpinning MET methodology and develops considerations regarding evidence informed practice with attention to current debates Updated chapter on the history of MET explains the impact of historical context on clinical practice Increased emphasis on pulsed MET and updated research on the role of isotonic eccentric stretching and isometric eccentric contractions in rehabilitation strengthening and restoring functionality Developed section and references to fascia research and its implications for MET Updates in all chapters prioritizing whole person healthcare Fully updated references throughout with close cross referencing between chapters and awareness of international context and research developments This book is ideal for all professionals with an interest in manual and movement therapy including osteopaths physiotherapists exercise scientists chiropractors acupuncturists manual therapists massage therapists and personal trainers

Literacy Instruction for Students Who are Deaf and Hard of Hearing Jennifer S. Beal, Hannah M. Dostal, Susan R Easterbrooks, 2024-07-12 Most students who are deaf or hard of hearing DHH struggle with acquiring literacy skills some as a direct result of their hearing loss some because they are receiving insufficient modifications to access the general education curriculum and some because they have additional learning challenges necessitating significant program modifications This second edition of Literacy Instruction for Students who are Deaf and Hard of Hearing updates previous findings and describes current evidence based practices in teaching literacy to DHH learners Beal Dostal and Easterbrooks provide educators and parents with a process for determining which literacy and language assessments are appropriate for individual DHH learners and whether an instructional practice is supported by evidence or causal factors They describe the literacy process with an overview of related learning theories language and literacy assessments and evidence based instructional strategies across the National Reading Panel s five areas of literacy instruction phonemic awareness phonics vocabulary fluency and comprehension The volume includes evidence based writing strategies and case vignettes that highlight application of assessments and instructional strategies within each of these literacy areas Crucially it reviews the remaining challenges related to literacy instruction for DHH learners Educators and parents who provide literacy instruction to DHH learners will benefit from the breadth and depth of literacy content provided in this concise literacy textbook

Unter dem Link Leseprobe kann das Gesamtverzeichnis als PDF Datei heruntergeladen werden [Machine Learning and Immersive Technologies for User-centered Digital Healthcare Innovation](#) Federico Colecchia, Eleonora Ceccaldi, Daniele Giunchi, Fang Wang, Rui Qin, 2025-06-09 Emerging technologies such as machine learning and immersive technologies including virtual reality and augmented reality hold great potential for driving disruptive healthcare innovation. However, the adoption of digital technology in healthcare, including use of data-driven tools in support of clinical decision making and patient-facing applications relying on consumer electronic devices, is often hindered by issues of user experience, trust, equitability, and fairness. There is increasing recognition of a need to facilitate further convergence between the development of emerging technologies and user-centered design research for healthcare with a view to achieving a positive impact on patients' care, professionals, and the healthcare system. This article collection addresses current development trends relating to user-centered digital healthcare innovation based on machine learning and immersive technologies in order to identify opportunities associated with the deployment of new solutions in a range of environments, including clinical, domestic, and educational settings, and barriers to the adoption of technology by end users. A key aim is to identify opportunities for strengthening interdisciplinary collaboration as well as methods of lowering barriers and overcoming obstacles for the benefit of patients' care, professionals, and the healthcare system. Examples of potential outcomes are effective design and use of solutions based on machine learning and immersive technologies to improve user experience, strategies to facilitate ethical development of digital technology for healthcare, and methods of encouraging adoption of advanced tools developed in line with principles of equitability and fairness. Articles should address issues of user-centered digital healthcare innovation driven by machine learning and immersive technologies. Submissions should ideally be positioned at the intersection of digital technology development with user-centered design, although contributions more technical in nature as well as user experience studies are also welcome. A non-exhaustive list of suitable topics and manuscript types is given below: Machine learning and/or immersive technologies including augmented reality and virtual reality for user-centered digital healthcare; Clinical decision support systems; Patient-facing applications; Tools for education and training of future medical professionals; Potential barriers to adoption of technology; Issues of user experience, trust, equitability, and fairness in digital healthcare; Reviews and contributions discussing the development of intuitive, accessible, and inclusive digital interfaces. All aspects of healthcare that are being or have the potential to be impacted by machine learning and immersive technologies.
