Flying in the Face of Criminalization Sofia Michaelides-Mateou, Andreas Mateou, 2016-04-15 Two parallel investigations take place after every aviation accident one technical one judicial The former must be conducted with the sole intention of making safety recommendations to prevent the recurrence of similar accidents The judicial investigation however has the intention of identifying those parties that have been at fault and to apportion blameworthiness for criminal and civil liability Consequently this results in a predicament for those parties that have been identified as having played a role in the accident a dilemma between not supplying information aimed at enhancing safety and preventing future accidents and on the other hand supplying such information which may possibly be used against them in subsequent criminal prosecution The situation is compounded by inconsistent approaches between different legal systems aviation professionals may find themselves faced with criminal charges in one country but not in another and they may also be unsure as to whether statements given during the technical investigation could be used against them in a court of law Aviation safety is to a large extent built upon the trust placed by pilots ATCOs and other aviation professionals in the process of accident investigation This book examines the growing trend to criminalize these same people following an accident investigation and considers the implications this has for aviation safety

Inside the Sky William Langewiesche, 1999-06-29 William Langewiesche's life has been deeply

intertwined with the idea and act of flying Fifty years ago his father a test pilot wrote Stick and Rudder a text still considered by many to be the bible of aerial navigation Langewiesche himself learned to fly while still a child Now he shares his pilot s eye view of flight with those of us who take flight for granted exploring the inner world of a sky that remains as exotic and revealing as the most foreign destination Langewiesche tells us how flight happens what the pilot sees thinks and feels His description is not merely about speed and conquest It takes the form of a deliberate climb leading at low altitude first over a new view of a home and then higher into the solitude of the cockpit through violent storms and ocean nights and on to unexpected places in the mind In Langewiesche s hands it becomes clear at the close of this first century of flight how profoundly our vision has been altered by our liberation from the ground And we understand how when we look around we may find ourselves reflected in the grace and turbulence of a human sky United States Army Directory United States.
