Heat George Monbiot, 2009-03-19 George Monbiot's *Heat* How to Stop the Planet from Burning marks an important moment in our civilization's thinking about global warming The question is no longer whether climate change is actually happening The question is what to do about it Monbiot offers an ambitious and far reaching program to cut our carbon dioxide emissions to the point where the environmental scales start tipping away from catastrophe But not before he devotes a chapter to unmasking the vested interests that have spent fortunes funding the specious science of the climate change deniers It now seems certain that we need a 90% cut in our emissions by 2030 to prevent runaway climate change from taking place For the first time this book explains how the cut could be achieved without bringing industrial civilisation to an end Combining his unique knowledge of political campaigning and environmental science Monbiot analyses the potential of energy efficiency renewable resources carbon burial nuclear power and new transport and building systems to discover what works what doesn't what costs the least and what needs to be done to make change happen He is not afraid to attack anyone friend or foe whose claims are false or whose figures have been fudged His original sometimes shocking programme shows that we can reconcile our demands for comfort and security with the survival of the biosphere Rigorous passionate and totally surprising this book could change the world It is possible to slow the momentum of this global crisis if we act decisively In this riveting fiery book the No Logo of the environmental movement George Monbiot shows us how

Dwell, 2001-06 At *Dwell* we're staging a minor revolution We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines

\$20 Per Gallon Christopher Steiner, 2009-07-15 An extraordinarily insightful and thought provoking look at how our society and culture are going to change and change rapidly as the price of gasoline heating oil and all other everyday consumer products that are derived from oil continue to escalate Imagine an everyday world in which the price of gasoline and oil continues to go up and up and up Think about the immediate impact that would have on our lives Of course everybody already knows how about gasoline

has affected our driving habits People can't wait to junk their gas guzzling SUVs for a new Prius But there are more not so obvious changes on the horizon that Chris Steiner tracks brilliantly in this provocative work Consider the following societal changes people who own homes in far off suburbs will soon realize that there's no longer any market for their houses reason nobody wants to live too far away because it's too expensive to commute to work Telecommuting will begin to expand rapidly Trains will become the mode of national transportation as it used to be as the price of flying becomes prohibitive Families will begin to migrate southward as the price of heating northern homes in the winter is too pricey Cheap everyday items that are comprised of plastic will go away because of the rising price to produce them plastic is derived from oil And this is just the beginning of a huge and overwhelming domino effect that our way of life will undergo in the years to come Steiner an engineer by training before turning to journalism sees how this simple but constant rise in oil and gas prices will totally restructure our lifestyle But what may be surprising to readers is that all of these changes may not be negative but actually will usher in some new and very promising aspects of our society Steiner will probe how the liberation of technology and innovation triggered by climbing gas prices will change our lives The book may start as an alarmist's exercise but don't be misled The future will be exhilarating
