**China's Military Power** Roger Cliff, 2015-09-15 Once termed the world's largest military museum the Chinese military has made enormous progress over the past twenty years. With skyrocketing military budgets and new technology, China's tanks, aircraft, destroyers, and missile capabilities are becoming comparable to those of the United States. If these trends continue, how powerful will the Chinese military be in the future? Will its capabilities soon rival or surpass those of the United States? The most comprehensive study of its kind, this book provides a detailed assessment of China's military capabilities in 2000 and 2010, with projections for 2020. It is the first of its kind in outlining a rigorous, theoretically and empirically grounded framework for assessing military capability based on not just weaponry but also doctrine, training, equipment, and organizational structure. This framework provides not only the most accurate assessment of China's military to date but an important new tool in the study of military history.

**Propaganda and Public Relations in Military Recruitment** Brendan Maartens, Thomas Bivins, 2020-11-19 This book represents the first international investigation of military recruitment, advertising, public relations, and propaganda. Comprised of eleven case studies that explore mobilisation work in Africa, the Americas, Asia, and Europe, it covers more than a hundred years of recent history with chapters on the First and Second World Wars, the Cold War, and the present day. The book explores such promotion in countries both large and small and in times of both war and peace, with readers gaining an insight into the different strategies and tactics used to motivate men, women, and occasionally even children to serve and fight in many parts of the world. Readers will also learn about the crucial but little-known role of commercial advertising, public relations, and media professionals in the production and distribution of recruitment promotion. This book, the first of its kind to be published, will explore that role and in the process address two questions that are central to studies of media and conflict: how do militaries encourage civilians to join up, and are they successful in doing so? It is a multi-disciplinary project intended for a diverse academic audience, including postgraduate students exploring aspects of war, propaganda, and public opinion, and researchers working across the domains of history, communications studies, conflict studies, psychology, and philosophy.

**Masculinities at the Margins** Amanda Chisholm, Joanna Tidy, 2020-05-18 Across a rich terrain of empirical and theoretical trajectories the concept of military masculinity now understood in its plural as military masculinities has been a significant conceptual tool in both feminist international relations IR and in critical men and masculinities studies scholarship The concept has helped us to unpack the relationships between gender war and militarism including how military standards function in the production of wider normative hegemonic manliness As such military masculinities has been a rewarding tool for many scholars who take a critical approach to the study of war and the military This edited volume advances an emerging curiosity within accounts of military masculinities This curiosity concerns the silences within and disruptions to our well established and perhaps too comfortable understandings of and empirical focal points for military masculinities gender and war The contributors to this volume trouble the ease with which we might be tempted to synonymize militaries war and a neat hegemonic masculinity Taking the disruptions the asides and the silences seriously challenges the common wisdoms of military masculinities gender and war in productive and necessary ways Doing so necessitates a reorientation of where to whom and for what we look to understand the operation of gendered military power The chapters were originally published in a special issue of Critical Military Studies

**Counter-Recruitment and the Campaign to Demilitarize Public Schools** Scott Harding, Seth Kershner, 2016-04-29 This book describes the various tactics used in counter recruitment drawing from the words of activists and case studies of successful organizing and advocacy The United States is one of the only developed countries to allow a military presence in public schools including an active role for military recruiters In order to enlist 250 000 new recruits every year the US military must market itself to youth by integrating itself into schools through programs such as JROTC Junior Reserve Officers Training Corps and spend billions of dollars annually on recruitment activities This militarization of educational space has spawned a little noticed grassroots resistance the small but sophisticated counter recruitment movement Counter recruiters visit schools to challenge recruiters messages with information on non military career options activists work to make it harder for the military to operate in public schools they conduct lobbying campaigns for policies that protect students private information from military recruiters and counter recruiters mentor youth to become involved in these activities While attracting little attention counter recruitment has nonetheless been described as the military recruiter's greatest obstacle by a Marine Corps official
