become one of the world's fastest growing disciplines with ever emerging new applications of research and development. The Routledge International Handbook of Military Psychology and Mental Health is a compendium of chapters by internationally renowned scholars in the field bringing forth the state of the art in the theory, practice and future prospects of military psychology. This uniquely interdisciplinary volume deliberates upon the current issues and applications of military psychology not only within the military organization and the discipline of psychology but also in the larger context of its role of building a better world. Split into three parts dedicated to specific themes, the first part of the book, *Military Psychology: The Roots and the Journey*, provides an overview of the evolution of the discipline over the years, delving into concepts as varied as culture and cognition in the military, a perspective on the role of military psychology in future warfare and ethical issues. The second part, *Soldiering, Deployment and Beyond*, considers the complexities involved in soldiering in view of the changing nature of warfare, generating a focal discourse on various aspects of military leadership, soldier resilience and post-traumatic growth in the face of extreme situations, bravery and character strengths and transitioning to civilian life. In the final section, *Making a Choice: Mental Health Issues and Prospects in the Military*, the contributors focus on the challenges and practices involved in maintaining the mental health of the soldier, covering issues ranging from stress, mental health and well-being through to suicide risk and its prevention, intervention and management strategies, moral injury and post-traumatic stress disorder. Incorporating enlightening contributions of eminent scholars from around the world, the volume is a comprehensive repository of current perspectives and future directions in the domain of military psychology. It will prove a valuable resource for mental health practitioners, military leaders, policy makers and academics and students across a range of disciplines.

Military Psychology for Africa Gideon AJ van Dyk, 2016-03-17. *Military Psychology for Africa* is the first textbook of its kind from Africa. Selected authors with competent military psychology knowledge, skills, expertise and experience each contributed a chapter to this unique book. The book empowers academics, students and military fellows to apply this knowledge at academic institutions and military units during operations and in presenting short courses. The book will also equip soldiers with new knowledge for advancing peace on the continent and abroad. The 71F Advantage National Defense University Press, 2010-09. Includes a foreword by Major General David A. Rubenstein. From the editor: 71F or 71 Foxtrot is the AOC area of concentration code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires first of all a Ph.D. from a research, not clinical, intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving and enhancing the health, well-being, morale and performance of Soldiers and military families. As is clear throughout the pages of

this book they do this in many ways and in many areas but always with a scientific approach This is the 71F advantage applying the science of psychology to understand the human dimension and developing programs policies and products to benefit the person in military operations This book grew out of the April 2008 biennial conference of U S Army Research Psychologists held in Bethesda Maryland This meeting was to be my last as Consultant to the Surgeon General for Research Psychology and I thought it would be a good idea to publish proceedings which had not been done before As Consultant I d often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living In addition to our core group of 71Fs at the Bethesda 2008 meeting we had several brand new members and a number of distinguished retirees the grey beards of the 71F clan Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels with no sign of easing and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health well being and performance of Soldiers and their families
