Handbook of Adult Behavioral Assessment Michel Hersen, 2011-04-28 Given the vast amount of research related to
behavioral assessment it is difficult for clinicians to keep abreast of new developments In recent years there have been
advances in assessment case conceptualization treatment planning treatment strategies for specific disorders and
considerations of new ethical and legal issues Keeping track of advances requires monitoring diverse resources limited to
specific disorders many of which are theoretical rather than practical or that offer clinical advice without providing the
evidence base for treatment recommendations This handbook was created to fill this gap summarizing critical information for
adult behavioral assessment The Clinician's Handbook of Adult Behavioral Assessment provides a single source for
understanding new developments in this field cutting across strategies techniques and disorders Assessment strategies are
presented in context with the research behind those strategies along with discussions of clinical utility and how assessment

and conceptualization fit in with treatment planning The volume is organized in three sections beginning with general issues followed by evaluations of specific disorders and problems and closing with special issues To ensure cross chapter consistency in the coverage of disorders these chapters are formatted to contain an introduction assessment strategies research basis clinical utility conceptualization and treatment planning a case study and summary Special issue coverage includes computerized assessment evaluating older adults behavioral neuropsychology ethical legal issues work related issues and value change in adults with acquired disabilities Suitable for beginning and established clinicians in practice this handbook will provide a ready reference toward effective adult behavioral assessment **Catalogue of Copyright Entries**
