Contemporary Research and Perspectives on Early Childhood Mathematics Education Iliada Elia, Joanne Mulligan, Ann Anderson, Anna Baccaglini-Frank, Christiane Benz, 2018-02-21 This book brings together a collection of research based papers on current issues in early childhood mathematics education that were presented in the Topic Study Group 1 TSG 1 at the 13th International Congress on Mathematical Education ICME 13 held at the University of Hamburg in 2016 It will help readers understand a range of key issues that early childhood mathematics educators encounter today Research on early childhood mathematics education has grown in recent years due in part to the well documented positive relation between children's early mathematical knowledge and their later mathematics learning and to the considerable emphasis many countries are now placing on preschool education The book addresses a number of central questions including What is mathematical structural development and how can we promote it in early childhood How can multimodality and embodiment contribute to early mathematics learning and to acquiring a better understanding of young children's mathematical

development How can children's informal mathematics related experiences affect instruction and children's learning in different mathematics content areas What is the role of tools including technology and picture books in supporting early mathematics learning What are the challenges in early childhood mathematics education for teachers education and professional development The Brilliance of Black Children in Mathematics Jacqueline Leonard, Danny B.

Martin, 2013-03-01 This book is a critically important contribution to the work underway to transform schooling for students who have historically been denied access to a quality education specifically African American children The first section of the book provides some historical perspective critical to understanding the current state of education in the U S specifically for the education of African American children The following sections include chapters on policy learning ethnomathematics student identity and teacher preparation as it relates to the mathematical education of Black children Through offering counternarratives about mathematically successful Black youth advocating for a curriculum that is grounded in African American culture and ways of thinking providing shining examples of the brilliance of Black students and promoting high expectations for all rather than situating students as the problem the authors of this book provide powerful insights related to the teaching and learning of mathematics for African American students As is made evident in this book effective teaching involves much more than just engaging students in inquiry based pedagogy Kitchen 2003 The chapters offered in this book demonstrate how mathematics instruction for African American students needs to take into account historical marginalization and present day policies that do harm to Black students Kunjufu 2005 Empowering mathematics instruction for African American students needs to take into consideration and promote students cultural spiritual and historical identities Furthermore mathematics instruction for African American students should create opportunities for students to express themselves and the needs of their communities as a means to promote social justice both within their classrooms and communities **DOE this Month**, 1985 **Math & Science for Young Children** Rosalind Charlesworth, Karen Lind, 2007

Undermining Gender Jessica Smith Rolston, 2014-03-31 Though mining is an infamously masculine industry women make up 20 percent of all production crews in Wyoming s Powder River Basin the largest coal producing region in the United States How do these women fit into a working culture supposedly hostile to females This is what anthropologist Jessica Smith Rolston herself a onetime mine worker and the daughter of a miner set out to discover Her answers based on years of participant observation in four mines and extensive interviews with miners managers engineers and the families of mine

employees offer a rich and surprising view of the working families that miners construct In this picture gender roles are not nearly as straightforward or as straitened as stereotypes suggest Gender is far from the primary concern of coworkers in crews Far more important Rolston finds is protecting the safety of the entire crew and finding a way to treat each other well despite the stresses of their jobs These miners share the burden of rotating shift work continually switching between twelve hour day and night shifts which deprives them of the daily rhythms of a typical home from morning breakfasts to bedtime stories Rolston identifies the mine workers response to these shared challenges as a new sort of constructed kinship that both challenges and reproduces gender roles in their everyday working and family lives Crews expectations for coworkers to treat one another like family and to adopt an agricultural work ethic tend to minimize gender differences And yet these differences remain tenacious in the equation of masculinity with technical expertise and of femininity with household responsibilities For Rolston such lingering areas of inequality highlight the importance of structural constraints that flout a common impulse among men and women to neutralize the significance of gender at home and in the workplace At a time when the Appalachian region continues to dominate discussion of mining culture this book provides a very different and unexpected view of how miners live and work together and of how their lives and work reconfigure ideas of gender and kinship
