 - To resume use of the laptop, press the laptop or port replicator power button.

Please see "Welcome to the World of Wireless" on IT Help for further assistance.

TURNING WIRELESS ON AND OFF

Some airlines require wireless to be turned off while in flight. There is a switch on the side of your laptop that allows you to turn wireless on or off without having your laptop powered on. A red indicator means wireless is off.

There is also a wireless power light which also shows the status of wireless. This light is located above the keyboard.

Blue light = wireless ON.

No light = wireless OFF.

Remember wireless must be ON for the wireless software to work.
